OR-Fab's steel plate bumpers feature a tapered design to slide off obstacles, provide maximum tire clearance for large off-road tires, and have been built sturdy to protect our jeep. These bumpers are made of 3/16" plate steel which are precision laser cut and welded to provide optimum fit, form, and finish. Bumper mounts to the factory location using HD steel mounting brackets and come with reinforced D-ring mount. Included are D-ring shackles (we include these because we know you need them and truly find it senseless not to include them!). Available in wrinkle and bike black finishes.

PART NUMBER 87016

Enhance and protect the front of your Jeep XJ Cherokee with OR-Fab's grille guard. The grille guard, PN 87016 is manufactured from 1 3/4" .120 wall steel tube and is designed to mount on OR-Fab steel tube bumpers, PN-83202 and 83203.

OR-Fab's Side Armor protects your Jeep JK from damage, dents and scratches that occur while you're navigating through rocky and narrow trails. Made from 3/16" thick, precision laser cut steel plate, the side armor kit is easy to install and our instructions easily show how to properly use the armor as a template to mark and drill the holes. The kit includes a rivet-nut tool for ease of installation and all of the necessary hardware. Can be used with OEM or Rubicon rock rails or most aftermarket rock rails. Available in a black gloss or wrinkle powder coat finish.

PART NUMBER 84320

(Don't forget your Rocker Side-Armor Liner Part Number #87320 -- Made from 1/16" thick EDPM synthetic rubber (Ethylene Propylene Diene Monomer), that outlasts natural rubber and neoprene when exposed to extreme temperature conditions, solvents and sunlight. -- Sold Separately.)

OR-Fab's Rear Armor for the Jeep Cherokee XJ provides incredible protection for the vehicles rear quarter panels and taillights. Made from 3/16" thick steel plate, it easily attaches to the rear factory quarter panels with stainless steel hardware that's provided in the kit. The XJ Body Armor is also available with a 1.5" diameter rail-bar that's made from .120 wall steel tubing. The OR-Fab XJ armor fits all 1984-2001 Jeep Cherokee models and works with factory or aftermarket fender flares.

OR Fab Rock Doors provide a clear view of the trail and offer the driver and passengers a higher level of safety when the factory doors are removed for trail rides. These doors are manufactured from 1", .095 thick steel tubing with full-loop construction for superior strength and come with OR FABs exclusive Gecko Nylon safety pad that includes a Zippered Map Pouch. The doors feature adjustable hinges and latches for a perfect fit. Furthermore, the OR FAB Rock Doors are easy to install and do not require any drilling. Available for Jeep CJ, YJ, TJ and JK two and four door models. Available in either gloss or wrinkled black powder coat.

PART NUMBER 87007

TRANSMISSION CROSS MEMBER

OR-Fab's new heavy-duty crossmember replaces the weak factory unit found on 07-11 Jeep JK Wranglers. Made from 3/16" steel plate, and featuring a fully box welded construction, OR-Fab's crossmember is 50% stronger than the factory unit and uses DOM inserts that also strengthen its mounting points to the vehicles frame. The slim design also provides an additional 1/4" of ground clearance for greater mobility over large obstacles, and to avoid getting high-centered. The kit even comes with 1/2" stainless steel button head bolts that allow your Jeep to easily slide over obstacles and withstand serious abuse that would normally dent and twist the factory crossmember out of shape.

NEW

07-11 JEEP WRANGLER JK HD TRANSMISSION CROSS MEMBER

PART NUMBER 87034

TJ SKID PLATE

04-06 WRANGLER TJ STEERING GEAR BOX SKID PLATE

PART NUMBER 81002

OR-Fab offers rock solid protection for your Jeep with the company's Rock Slider Bars and Rocker Protectors. These heavy-duty bars are manufactured from .120-wall steel tubing that offer superior rocker panel protection and easy installation. While many rock slider bars bolt only to the outside of the factory rockers, the OR-Fab units wrap around and under the factory rockers, to provide complete protection for your Jeep under extreme trial conditions. Available for TJ, TJK, and JK two and four-door models.

PART NUMBER 84200

OR-Fab's Rock rails are designed to be both functional on the trail as well as in town. Our Rock Rails combine 3/16" thick plate with .120 wall tube to form one of the sturdiest Rock Sliders available. The Rock Rails mount to the factory pinch seam and wrap underneath the factory rocker to connect into the tub stiffener channels. The Slider Bar extends 4" from vehicle body to function as a convenient step.

OR-Fab's Jeep YJ Sport Cage provides extra strength and rigidity while also looking great. Manufactured from 1 3/4" inch diameter, .120-wall tubing, the cage is designed to provide maximum head and leg room and solidly connects the vehicles sport bar, windshield frame and dash. Some minor drilling is required.

YJ SPORT CAGE

87-95 WRANGLER YJ SPORT CAGE

PART NUMBER 82095

Older Jeep CJs can utilize OR-Fab's steel weld-in Sport Cage for the 1976 to 1979 models. 1980 to 1986 model CJs use OR-Fab's weld-in sport cage. Both cages come in raw steel and must be painted.

CJ SPORT CAGE

76-86 WRANGLER CJ SPORT CAGE (WELD IN)

PART NUMBER 82079

PART NUMBER 82086

FEATURES AT A GLANCE:

Fits 2011-2012 model dash design

Made from strong 1 3/4" diameter .120-wall tubing

Strengthens the vehicle's chassis

Easy installation

Tightly hugs the contours of the Jeep's interior, taking up minimum space

Can be used with factory or aftermarket cloth or hard tops

Integrated driver and passenger side grab handles

Includes two front streamer bars

Made in the U.S.A.

Available in Textured Wrinkle Black or Gloss Black powder coat finish

OR-Fab's Floor Mount Kit strengthens the chassis on Jeep JK Wranglers by bolting onto the Jeep's floor channel reinforcement and door pinch weld seams. The Floor Mount Kit is required before installing any OR-Fab Jeep JK Wrangler Sport Cage.

WILL NOT RATTLE!

OR-Fab Jeep Spare Tire Carriers incorporate reinforced inner braces that are bolted inside the tub to provide superior strength, eliminate vibrations and noise caused by rattle. These spare tire carriers can carry up to a 37" tire and two Gerry cans. All OR-Fab Spare Tire Carriers are made from 1.5" diameter, .120 wall steel tubing and allow full access to the tailgate with a swing-away design that doesn't interfere with the factory or aftermarket rear bumpers. They also feature a heavy-duty hinge with a 500 lbs. lockable and adjustable draw latch. The tire carriers also feature a location for a Hi-Lift® Jack and CB antenna mount, and are available in a smooth or wrinkle black powder coat finish.

trail master

SUSPENSION
 MATCHED SYSTEMS. UNMATCHED TECHNOLOGY.

trail master suspension kits are designed and built by enthusiasts in the U.S.A. We test our kits on the same trails other enthusiasts prefer. If you're like us and drive your Jeep both on and off the road, you'll appreciate the suspension's design that provides a smooth and comfortable ride on the rocks as well as the asphalt. All trail master suspension systems are perfectly matched and manufactured to ensure the highest quality possible while maintaining the ride and look you demand. All kits are delivered complete with required mounting hardware and detailed installation instructions.

JK SUSPENSION SYSTEMS

07-12 JK JEEP WRANGLER "STEALTH" 4.5" LONG ARM SUSPENSION LIFT WITH FOX SHOCKS

Providing improved articulation and ground clearance for serious rock crawling. Delivers 4.5" of lift and comes with your choice of Fox® adjustable reservoir shocks (PN-J4618FOX), trail master's SSV variable speed-sensing shocks (J4618SSV), or without shocks (PN-J4618), to accommodate your own upgrade.

PART NUMBER
 J4618FOX

07-12 JK JEEP WRANGLER 4.5" LIFT

4.5" Suspension lift using new front and rear coil springs. Retains factory control arms. Kit includes replacement front track bar and rear track bar relocation bracket. Complete with SSV shock absorbers Retains factory steering geometry. Easily accommodates 35" tires.

PART NUMBER
 J4611SSV

07-12 JK JEEP WRANGLER 3" LIFT

3" Suspension lift using new front and rear polyurethane spring spacers. Retains factory control arms. Kit includes replacement front track bar and rear track bar relocation bracket. Complete with SSV shock absorbers. Retains factory steering geometry. Easily accommodates 33" tires.

PART NUMBER
J4612SSV

07-12 JK JEEP WRANGLER 4.5" LIFT

Heavy duty quick disconnect sway bar links with heim joints for improved mobility. Front and rear DOT approved steel braided, Kevlar lined extended brake lines for extreme durability. .250 Walled DOM tube replacement upper and lower control arm with flex joint for maximum articulation. and rear track bar relocation bracket. Fits 2 & 4 door Sport and Rubicon models. Easily accommodates 35" tall tires.

PART NUMBER

97-06 TJ JEEP WRANGLER 4WD 2" LIFT

- "On-the-fly" ride adjustability, no buttons or dials to adjust, or lines that leak and connections that fail
- SSV Speed Smart Valve adjusts to road surfaces automatically
- Applications for stock height or lifted jeeps
- Tough, platinum-gray outer finish – 240 hour salt spray tested
- Black urethane bushings and dust boot included
- Application specific valving, not "one shock fits all"
- Low pressure nitrogen gas charging reduces oil foaming and outperforms foam cell shocks
- Large 2 3/8" diameter cylinders – industry's largest

Trail Master front coil spring leveling suspension systems provide 2 or 2 1/2" of front end lift (depending on application) to select Jeeps, removing the OE factory rake. New Urethane bushings replace the stock rubber spring bushing on top of the OE coil and include a built in recess to accept factory coil, insuring a snug fit. Kits come complete with machined aluminum spacers (where application requires), new grade 8 bolts, and detailed installation instructions.

URETHANE LEAF SPRING BUSHING KIT

PART NUMBER
BK82

- Urethane components last far longer and perform much better than traditional rubber products
- Replacing rubber bushings on your truck not only increases performance but adds to the visual appeal of your vehicle
- Spring bushings, C-bushings, shock and stabilizer bushings are available in a multitude of colors
- Urethane bump stops are highly recommended on vehicles with suspension lifts to prevent leaf and coil spring over-compression
- Available in sizes from 5/8" to 4 1/2" to fit any truck
- Bump stops also help prevent damage to suspension components should bottoming out occur

STEERING ARMS

- Pitman and steering arms are necessary on many lifted vehicles.
- Each arm is drop forged and heat treated for superior strength
- When necessary, camber and caster adjustment kits ensure proper steering and tracking

87-06 WRANGLER TJ, UNLIMITED TJL, RUBICON, WRANGLER YJ, PITMAN ARM 4" LIFT

PERFORMANCE ACCESSORIES™

WHY BODY LIFTS?

- **AFFORDABILITY:** Performance Accessories BODY LIFTS are a very affordable option when considering lifting a vehicle; in some cases a Performance Accessories body lift can be as much as 3 times less than a comparable suspension system.
- **RIDE:** Since body lift systems do not alter or change suspension components there is no deterioration of the quality factory ride.
- **WARRANTY:** Since Performance Accessories body lift systems do not change or alter factory parts the factory warranty is not Effected.
- **GREATER APPLICATIONS:** Due to our professional engineering staff Performance Accessories is usually the first to offer a lift for new vehicles or difficult to fit vehicles.
- **LARGER TIRES:** The primary reason for a consumer to lift their vehicle is that they want to install larger tires and wheels. A body lift from Performance Accessories allows the consumer to increase two to three tire sizes.
- **2WD vs. 4WD:** Most Performance Accessories body lift systems fit both 2WD and 4WD vehicles.
- **VALUE:** When you combine the many reasons listed above Body Lift systems from Performance Accessories are by far the best value when lifting a vehicle.
- Compatible with Stabilitrak applications.

JK BODY LIFT

07-11 JEEP WRANGLER JK, 2 AND 4 DOOR, AUTO TRANSMISSION

This body lift system consists of tough polygraphite blocks, a compound of polyester, graphite, nylon and fiberglass strands. Body lift systems come complete with brackets, hardware and detailed instructions

PART NUMBER
991

TJ BODY LIFT KIT

JEEP WRANGLER TJ 1997-2005 AND 04/05 TJL, 4WD ONLY

Each kit contains lift blocks made of high-grade reinforced nylon. All mounting hardware is grade 5 zinc plated for strength and corrosion protection, which is critical on the underside of the vehicle. Gain the tire clearance you have always wanted without changing the entire suspension system on your Jeep® Vehicle.

PART NUMBER
951

YJ BODY LIFT KIT

86-95 JEEP WRANGLER YJ, MANUAL TRANSMISSION, 4WD ONLY

This Performance Accessories body lift is design to fit your 1986-1995 Jeep Wrangler. This kit raises the body of your truck by 1" to facilitate the use of a larger wheel and tire package

PART NUMBER
931

CJ BODY LIFT KIT

72-86 JEEP CJ-5, CJ-7, SCRAMBLER, 4WD ONLY

1" lift, Includes high grade nylon-reinforced lift blocks, roll pins, mounting hardware, and installation instructions. Made from grade 5 zinc plated material using state of the art CNC equipment. Allows the increase of tire size for greater ground clearance and rugged look. Doesn't change suspension components.

PART NUMBER
911

CHECK OUT OUR NEW BOXES!

World's Best Selling 1", 2" and 3" Body Lift Kits for Jeeps. Maintains vehicle's factory ride characteristics. Lift Kit contains heavy duty brackets and high grade reinforced nylon blocks. Includes all necessary hardware and installation instructions.

Leveling kits can be installed by a seasoned home mechanic, but they may require a coil spring compressor tool, heavy duty jackstands and a heavy duty jack. Typically leveling kits can be inexpensive depending on the vehicle make and amount of parts necessary to raise the vehicle.

- These custom-engineered Leveling Kits lift your front suspension to match your rear height
- Riding level with the road, your pickup gains a sleek, eye-catching look
- Best for increasing tire diameter by one or two sizes over OEM tire size.
- Your stock ride quality remains the same after properly installing the Performance Accessories Leveling Kit
- Spacers are built tough from either urethane or aluminum for decades of dependable service
- Easily removed for leased vehicles
- Improved off-road traction
- Straightforward Installation — the fastest, least expensive way to level your truck
- The Strongest and Safest Forged Torsion Key Leveling system on the market today!

GREASEABLE SHACKLE SETS

In order for your suspension to work smoothly, squeak-free, and without binding, springs and shackles must move freely. Stock suspension just doesn't get the job done, but we have the solution: Our Greaseable Shackle sets! Based on our already great lift and lowering shackles, these kits come complete with drilled, hardened bolts, grease fittings, our own urethane bushings molded to facilitate lubrication, nylock nuts, and a generous supply of poly lube. Try a set and you'll be amazed at the difference in your suspension's performance!

SHACKLE SETS

Are you looking for a little lift for your truck, Jeep or SUV? A Performance Accessories spring shackle lift may be just what you need! We have applications for Jeep, Toyota, Isuzu, and Suzuki vehicles. Ranging from stock replacement to 2 1/2" lift, we have a shackle lift that meets your needs.

To ensure years of dependable service, our lift shackles are constructed of 3/8" thick steel with fully welded center supports. All corners are rounded to avoid interference problems. New grade 5 zinc plated hardware is included with each shackle lift kit, along with our detailed instructions and full technical support. All shackles are clad in a durable gold powder coated finish.

If lower is the way you want to go, we have a shackle for you too! Designed to drop Chevrolet/GMC and Ford trucks either 2" or 2 1/4" (depending on the year), Performance Accessories lowering shackles not only lower your truck, but help give it the cool, "just right" stance you want.

Lowering shackles are constructed from the highest quality, 1/2" steel, manufactured through a series of computer controlled processes to ensure the highest quality, best fit and appearance available. Lowering shackles include our own polyurethane bushings.

Once you have installed the Performance Accessories body lift and put on those larger tires, improve your ride by adding a set of trail master shock absorbers. The trail master shock absorbers will rein in those unruly large tires and wheels, both off-road and on the highway.

97-06 JEEP WRANGLER BODY BUSHING KIT

PART NUMBER
19016

Urethane body bushing kits have proven to be a popular addition to our product line! Jeep bushings over time crack, distort and crush. We've seen lots of Jeeps where the bushings have just plain fallen out! So, you'll want to install our body bushing kit to restore the ride height, stability and bushing life of your vehicle.

Also, think about replacing your OEM bushings when you add one of our lift kits - in fact, we offer a Master Kit for popular models which includes not only the lift components but a complete set of bushings and our Gap Guards as well!

U-BOLT SKID PLATE

Performance Accessories spring U-bolt skid plates protect your leaf spring U-bolts. Designed with the serious off-roader in mind, our skid plates come in a durable black powder coated finish and feature thick 1/4" spring plates and a heavy duty 3/16" skid plate with welded braces, to help protect U-bolts and axle from damage.

Available for front and rear of most Jeeps and Toyota Land Cruisers, spring U-bolt skid plates come with factory shock mounts and sway bar mounts where applicable. A dual shock version with second shock mount welded to the skid plate is also available for some models. Add two weld-on shock pins, sold separately, to make additional shock absorber installation as easy as possible.

If you've ever broken a U-bolt while trailblazing or rock climbing, you already understand the need for spring U-Bolt skid plates. If you haven't, don't wait until you're stuck in the middle of the desert with no easy solution. Instead, why don't you install a set of Performance Accessories spring U-bolt skid plates today?
