OWN A JEEP®?

The toughest four letter word on wheels. Are you looking for a parts source rugged enough to match your off the beaten path sense of adventure? With more than 15,000 unique part numbers from brands like Omix-ADA®, Rugged Ridge®, Alloy USA®, Outland Automotive®, ORV Suspension and Precision Gear, consider this your trail guide to the 4x4 of your dreams. A go anywhere, anytime, in any weather vehicle. Go ahead and smile, because it's going to take a lot of courage not to be cocky when you own a Jeep® like that.

WHO WE ARE

Omix-ADA is more than just a parts manufacturer, we're a community of enthusiasts dedicated to producing the finest in off-road solutions. Our products have been propelling four-wheel drive vehicles down highways, back roads and over the world's roughest terrain for over a decade. Omix's team of engineers have developed, tested and trail ridden thousands of new products until they were perfected for you.

AWARD WINNING DESIGNS

More than 2,500 new products were displayed at the recent SEMA Show. A group of 50 journalists and industry experts were charged with the task of judging the most innovative new products introduced into the automotive industry. As the judges tallied their scores, Omix-ADA emerged as one of the most decorated companies in the off-road sector.

LICENSED PARTS:

Why have we put so much time and energy into developing the most expansive collection of Jeep® parts available under one roof? Because the items bearing our logo are more than just parts, they are built with a legacy and heritage in mind. This is why we have been authorized to use the "MOPAR Authentic Restoration" and "MOPAR Official Licensed Product" logos for the more than 30 licensed parts we produce. We take pride in being one of the few manufacturers strong enough to stand behind the legendary Jeep® name.

OFFICIAL LICENSED PRODUCT

AUTHENTIC RESTORATION PRODUCT

THE OMIX-ADA® BRANDS:

Omix-ADA®: The parent company brand that offers thousands of parts and components for all Jeep® vehicles built from 1941 to current! Omix hard parts, undercarriage parts and body parts are all designed to bring your Jeep® back to life. Omix parts can be found in a separate catalog which your distributor can easily provide or feel free to go online to www.omix-ada.com. If there is a part you need for your Jeep®, there is an excellent chance that Omix can take care of you! www.omix-ada.com

Rugged Ridge® Accessories for Jeep®: Featuring the most complete line of high quality functional accessories for Jeep® vehicles. Rugged Ridge products can take you from street to trail and look good doing it. From beautiful polished stainless steel bolt on accessories to hard core off road protection and performance; Rugged Ridge has you covered. www.ruggedridgeoffroad.com

Alloy USA®: A full line of the highest quality, high performance off road and racing alloy axles, and ring & pinions developed for the serious off road enthusiast by off road enthusiasts. Alloy USA products feature premium alloy steel for strength and durability during your hard core adventures. Each Alloy USA product includes an industry leading 3, 5 or 10 year limited warranty for the peace of mind and confidence you demand. www.alloyusa.com

Outland®: If you own a truck or SUV, you need Outland Accessories. Outland features a full line of truck/SUV Tube Steps, Bull Bars, Consoles and other functional accessories to make your rig look great and perform even better. www.outlandautomotive.com

ORV™ Suspensions: Designed by Jeep® enthusiasts for Jeep® vehicles! ORV offers a full line of heavy duty suspension options to upgrade your vehicles off road capabilities. Each kit is specially designed for the Jeep® enthusiast and can be custom tailored for your particular needs. Get the ORV advantage. www.ruggedridgeoffroad.com

Precision Gear®: Drive train engineering perfected! Precision Gear offers a full line of heavy duty up-graded ring and pinion sets to make your vehicle run as efficiently as possible. Precision Gear products are made from only the highest quality materials and designs and offers a full range of applications for both on and off road vehicles. From street to trail, when only the best will do, look to Precision Gear Ring and Pinion sets! www.precisiongear.com

XHD Bumper System

XHD Modular Bumper System

The most advanced, toughest, most flexible bumper system ever created!

No other bumper can give your Jeep® this many looks. Modular design provides dozens of different looks and styles. You can build the exact bumper of your choice! Custom designed for the 1976-2006 Jeep® Wrangler & CJ, each component maximizes the oversized look of the vehicle. All components are constructed of heavy-duty textured black powder coat steel with a tough E-Coat under-coating or polished, no rust, prime 304 stainless steel for the ultimate look! These tough finishes will provide years of heavy-duty use. Matching rear bumpers are available for a complete look.

XHD Rear Bumper & Tire Carrier

XHD Rear Bumper

Make the most of your rear bumper with our XHD Rear Bumper System. Features easy installation, amazing looks and two reinforced heavy-duty D-Ring attachment points. Special "inner mounting plate" provides an extremely secure mounting point - strong enough for off-road use! The two-piece design allows use with and without tire carrier options. Heavy-duty powder coated steel design looks great but is extremely tough. Mount on the optional Tire Carrier and you can hold up to a 35" tire.

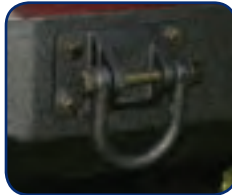

NEW!

Over Center Latching Mechanism Keeps Your Carrier Secure

Heavy-duty D-Ring attachment points are strong enough for off road use!

D-rings attach securely to the frame of the vehicle for a rock solid recovery mounting point.

The Massive Tapered Greasable Roller Bearing Hinge Supports Up To a 35" Tire.

Tire Carrier Linkage

Has opening your rear tailgate become a burden since you added a swing out tire carrier? Has it become easier to crawl over the rear seat to grab your gear, than hassling with the tire carrier? The Rugged Ridge Tire Carrier Linkage Kit eliminates the issue and makes accessing the cargo area quick and painless. Once installed the linkage mates the tire carrier to the tailgate, so both open in a single fluid movement. The Tire Carrier Linkage is designed to work with Rugged Ridge XHD, rear bumper and tire carriers, but will also work with most other aftermarket tire carriers. No drilling is required to mount the linkage to the tailgate, but some minor drilling is required to mount the linkage to the tire carrier.

RRC Rock Crawling Bumpers

RRC Rock Crawling Bumpers

Introducing the toughest, most durable off-road tube bumpers ever made! The Rugged Ridge Rock Crawling Bumpers (RRC) feature heavy-duty .120 wall 2" steel tubing treated with a special "E-Coating" and then dual stage powder-coated to ensure long life and a no-rust finish. These overbuilt tube bumpers not only look good but they are built to last! All RRC designs have been developed with true off-road enthusiasts in mind. From the reinforced welds to the built-in D-ring attachments, these bumpers and side guards are built to take what ever the trail throws at you.

RRC Front Grille Guards

The RRC Front Grille Guard is an easy to install front bumper system that offers an expanded opening for use with a winch (winch plate not included) or with up to four off-road lights. The RRC side supports elevate the tube upwards to provide fender protection while not altering the side clearance. Two reinforced D-ring attachments allow for easy use of optional D-rings (part no. 11235.01).

87-06 Wrangler Each *	11502.11	11502.12

* Including Wrangler Unlimited

11502.11 RRC Front Grille Guard, Textured Black

RRC Rear Bumpers

Rugged Ridge offers two RRC bumper options for the rear of your Jeep®. Both options work off a similar frame mounted platform that features a heavy-duty grid like system with raised sides for the ultimate protection and greatest ground clearance. All RRC Rear Bumpers also feature a reinforced hitch box that is designed for off-road accessories (not designed or rated for towing. Use only for accessories). The heavy-duty rear tire carrier model mounts your tire off the rear bumper taking the load off your tailgate. With a reinforced grease fitting and special latching mechanism, this tire carrier is capable of holding up to a 35" tire.

Carries Recovery Gear (not included)

Removable with Handy Carry Handle

Tire Carrier Recovery (TCR) Bag

The TCR bag has been designed to mount to Rugged Ridge RRC, XHD & Classic rear tire carrier bumpers. This bag allows the storage of all your recovery gear between the A-frame uprights on your rear tire carrier. Constructed of weather resistant material & features a zipper flap to help protect your gear from the environment. Attaches easily with 4 heavy-duty nylon straps that allow for quick removal and transport.

TCR Bag Fits RRC, XHD and Classic Rear Bumpers with Tire Carrier	12801.50

RRC Side Armor

Keep your rocker panels from being beaten to a pulp on the trail with Rugged Ridge's Side Armor. Built from heavy-duty 2" x 0.120" black texture powder coated steel tubing, these guards will take the beating that was meant for your sheet metal. YJ and TJ models require drilling. The black texture finish resists scratches and gives a slip-resistant surface for door entry. Sold as a pair and includes all necessary installation hardware.

Raised Winch Mount Plate	Specially Designed For 76-06 Tube Front Bumpers	11238.12			

All Rugged Ridge Front and Rear Bumpers feature smooth ground welds for an unbelievable look and further rust protection. No other tubular bumper manufacturer goes to the expense of smooth grinding their welds. This exclusive smooth grind process virtually eliminates small weld "pockets" that never seem to get full paint coverage and tend to rust over time. Finally, all Rugged Ridge Bumpers feature welded end caps rather than plastic end caps. Gone are the days of constantly replacing those lost tube bumper end caps after a long day on the trail.

Rear Tube Bumpers for 1955-2006 Jeep®

Rear Bumpers have a larger 17" rear opening allowing the use of oversized tires (up to 31") on the factory spare tire mount. This is a Rugged Ridge exclusive! Rugged Ridge Rear Tube Bumpers also feature a frame mounted hitch option that allows for lightweight towing (2,000lb towing weight, 200lb tongue weight capacity). Most other rear tube bumpers with integrated hitch boxes do not recommend towing, therefore making the hitch box virtually useless.

Rear Tube Bumper For 1955 - 06 Jeep® CJ & Wrangler

Get the off-road look with a Rugged Ridge Tube Bumper! Each bumper has smooth ground welds, welded end caps (not plastic end caps!) and the unique style only available from Rugged Ridge. Center tire cut-out allows for larger tires while still keeping that off-road look, accommodates tire sizes up to 35".

Side Tube Steps

Complete the look with a set of Rugged Ridge tubular tough duty side steps. Rugged Ridge Stainless Tube Steps feature prime 304L, .05" wall stainless tubing polished to a mirror finish. The polishing process for a Rugged Ridge step is longer and deeper pulling out the deepest shine from the steel. A true "deep polish"! Rugged Ridge painted steel Tube Steps feature special E-coated, .07" wall steel that is "thick source" powder coated for a tough chip resistant finish. The special E-coat undercoating provides double rust protection as it bonds to the metal creating a protective layer found nowhere else. All Rugged Ridge Tube Steps feature a truly custom fit with installation brackets constructed of durable 3/16" powder coated steel for long life and years of flex-free use. Each Tube Step features special UV treated no-slip step pads with 5 mounting pins. These step pads are preinstalled on top of the tube - no exposed metal to rust. 1976-06 models feature frame mount design which may require drilling.

All Terrain Fender Flares

Get that aggressive off road look with the NEW Rugged Ridge All Terrain Fender Flare! These 6" flares feature a stylish design while protecting your vehicles paint from flying rocks and mud. Constructed of durable UV treated ABS with a slight texture, these paintable flares provide a great look while being able to handle whatever nature throws at them. Each All Terrain Flare is designed to fit factory mounting points (CJ and YJ designs require some drilling) with durable rust proof stainless fasteners. Each front flare uses your existing side marker lights by easily attaching to custom light cut-outs. Backed by an industry leading 3 year limited warranty, these NEW All Terrain Flares will really set you apart from the crowd!

Oversized 7" Flares

Oversized 7" Flares

Need a little extra coverage for those over-sized tires? The Rugged Ridge 7" Flare gives you the extra coverage you need while providing the clean look of original equipment designs. Each over sized flare is constructed of virtually indestructible UV treated thermoplastic to provide years of service. The special UV treatment put on each flare provides protection from sun fading. These flares are designed to bolt onto your vehicle but for CJ and 1987-95 Wrangler models, some vehicle modification may be necessary to truly cover those oversized tires. If you go off-road and need to protect your vehicle from rock chips and debris, look to Rugged Ridge 7" oversized Fender Flares! Includes all mounting hardware.

Replacement Fender Flare Kits

Rugged Ridge provides the most comprehensive replacement Fender Flare program on the market today. Covering model years starting in 1955 until current, Rugged Ridge has you covered when it is time to replace or upgrade your Factory Fender Flares. Each Flare is constructed of virtually indestructible, durable, UV treated thermoplastic to provide years of service. Each replacement flare is designed to fit into your factory mounting holes (some models may require some hole relocation) for ease of installation. Just need to replace one flare? No problem. Rugged Ridge offers individual replacements to keep your investment to a minimum.

Wheel & Wheel Spacers

Steel D-Window Wheels

NEW!

Legendary looks, brutally epic strength. Each Rugged Ridge steel wheel is stamped from heavy gauge steel and powder coated with a durable black finish. Our wheels have been engineered, tested and certified to meet and exceed the strenuous SAE J2530 standards for wheel strength and durability. Turning a million cycles at double their load capacity to ensure they could hold up the abuses of off road use. Because a Jeep® isn't a Jeep until its lifted and outfitted with oversized tires.

Description	Part #
Steel wheel D-Window, Black, 15X8, 5 on 4.5 bolt pattern, 3.75 backspacing, Jeep Wrangler (YJ) 87-95, (TJ) 97-06 NEW	15500.01

* converting 5 on 4.5" to 5 on 5.5" bolt pattern

CAUTION!

CAUTION: Rugged Ridge™ recommends use of wheel spacers with all suspension lifts to reduce risk of roll over or other accident associated with modifying ride height for increased off road capabilities. See additional product safety information and WARNINGS at back of catalog.

Water Resistant Cab/Full Covers

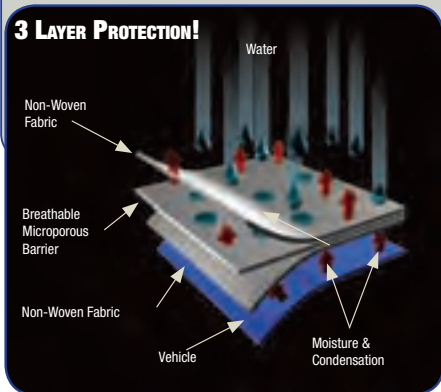

Custom fit Cab Covers protect your vehicles interior from dust, dirt and light showers. Constructed of vinyl coated polyester fabric or a space age cover material (Weather Lite/Three Layer Covers), these easy to use covers install in minutes. Reinforced elastic side straps and under body hooks hold the cab cover in place. No drilling required. Complete vehicle covers also available in breathable Weather Lite fabric or durable Three Layer Fabric. Weather Lite is perfect for inside storage while the Three Layer covers are designed for short term outdoor use.

Complete Cover kits with lock and storage bag available.

Rugged Ridge Summer Accessories

Summer time is why you own a Jeep®! With the warm weather comes the open air driving we all love. Rugged Ridge Summer Accessories make that open air driving more comfortable and stylish. Each accessory is manufactured to exacting specifications using tough matching vinyl coated fabrics that will provide years of great looks and high performance. When you demand the best, Rugged Ridge is what you need!

Summer Briefs

Custom designed for each body style, these easy on, easy off briefs provide protection from the hot sun and sudden showers. Each Rugged Ridge Summer Brief attaches to the factory center hoop and windshield with heavy-duty nylon straps to prevent flapping. Key rear strap attachments have quick release fasteners so once your straps are set, they easily detach and reattach. Wrangler models also incorporate thick hook and loop side mounts to further secure the top. All 1997-06 models are designed to be used with a no-drill Windshield Header (sold separately, see bottom of page) for quick conversion from hard top to Summer Brief.

*Requires separate Windshield Header (#13308.04) for installation. **Requires separate Windshield Channel (#13308.01) for installation.

Windshield Channels/Headers

These upgraded preassembled windshield headers installs quickly and easily! Just attach your Brief/Island Topper and place the header channel on the top of your windshield, slide the clamps onto the supplied knobs and clamp the channel in place. That's it! The channel is now securely held in place and ready for summer wheeling. No drilling or modifications required! Note: Will work with Bestop and other aftermarket summer tops. No Drill Windshield Header required for installation of Summer Briefs and Island Toppers on all 1997-06 Wranglers and Unlimited. Windshield Channels are required for installation of Summer Briefs and Island Toppers on all 1976-95 CJ/Wranglers.

Pocket Briefs

Tired of papers and other small items flying around the cab of your Jeep® when using your Summer Brief? Introducing the most innovative new addition to a Summer Brief in over 50 years the Pocket Brief from Rugged Ridge! This revolutionary design incorporates two mesh zippered corner pockets directly over the driver and passenger creating much needed storage space. Special two sided mesh and nylon "pocket" seals shut with a reinforced zipper, keeps small items secure even in the most severe conditions. Built directly into the Rugged Ridge Summer Brief to ensure a clean, tight fit. Constructed of durable soft top fabric for long life. Available in matching soft top colors to give your Jeep® a finished look.

Mesh Summer Briefs/Island Toppers™

Special UV treated mesh fabric blocks the heat while allowing the cool breeze to flow through. The special weave of the Rugged Ridge mesh brief/Island Topper is designed for strength and durability while providing open air protection from the sun's heat. Available in two great styles; the Summer Brief that goes to the center hoop and the "Island Topper" that goes back to cover those rear seat passengers. Don't forget the Header/Windshield channel needed to install these tops!

Island Toppers™

Provide the ultimate summer sun and rain protection with a Rugged Ridge Island Topper. Attaching the same way as our durable Summer Briefs, these full length tops provide protection from the elements for both the front and rear passengers. Rear attachment straps secure to the rear sport bar hoops on 1992-06 models. 1976-91 models include an easy to attach rear bow. All 1997-06 models are designed to be used with an optional, no-drill Windshield Header for quick conversion from hard top to Summer Brief.

Pocket Island Toppers™

Pocket Island Toppers feature zippered pockets to securely stow away important items like cell phones, maps and sunglasses.

The most advanced summer soft top solution found on the market today, the new Pocket Island Topper! This new design features tough diamond fabric combined with a pair of zipper front pockets for the ultimate full featured top. Unlike other summer tops on the market, the Rugged Ridge design features wider side hook and loop fastener straps, a reinforced front section and extra heavy duty nylon tie down straps.

35-36"	-	12804.09	12804.15	-	12804.35	-

Note: To ensure proper fit, measure the diameter of the tire you are covering and pick the appropriate tire cover size listed above.

XHD Replacement Soft Tops

Quality, Value, Selection, XHD Replacement Tops have you covered!

New and improved XHD Replacement Soft-Tops from Rugged Ridge are now available with 50% thicker glass! Each Fabric Soft Top is specifically designed to easily fit the factory original soft top hardware. Simply take off the old top and slip on the new. It's just that easy! These new designs feature reinforced stitching on the heavy "pull" areas as well as heavy duty 30 mil thick glass! All XHD Soft Tops feature durable vinyl coated polyester and cotton fabric that will last the test of time. All sewn seams use marine grade thread to make sure it does not deteriorate or discolor in the sun. Each seam is literally "welded shut" with durable heat seal tape to keep moisture out while keeping the original look of the top intact. Attaching the Rugged Ridge Top is easy with the factory original "belt rail" attachment method; simply tuck under the rail and go! All our tops feature two choices of door options as Jeep® offered the 97-06 Wrangler with upper soft doors or with full hard doors. Rugged Ridge makes a Replacement Top that fits either! Each top is backed by an industry leading 3 year limited warranty against manufacturer defects.

The most comprehensive line of replacement soft tops on the market, so you can choose what options are best for you!

13727.35 Fabric Replacement Top with Upper Doors for 03-06 Wrangler

13729.35 Fabric Replacement Top (no upper doors) for 03-06 Wrangler

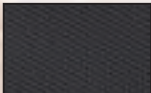

Zip-Out Windows

Get that safari look with the easily removable side and rear windows zipped out on Jeep® models! Rugged Ridge also offers a handy Window Storage Bag to protect those windows from damage. See page 25.

The Best Materials

All Rugged Ridge Soft Tops feature durable vinyl coated polyester and cotton fabric with "welded shut" seams that use durable heat seal tape to keep moisture out! These tops are real weather beaters and carry a 3 year limited warranty.

Diamond Fabric now available

NEW 30 mil thick DOT approved windows are 50% thicker than lower cost soft tops! Each is UV treated for long life and ultimate clarity!

Tinted Window Models Available

50% THICKER GLASS!

With Rugged Ridge you do not have to pay a fortune for 31% tinted window option! Each window has been up-graded to 30 mil which is 50% thicker than other soft top brands! Rugged Ridge tinted windows last longer and keep the heat out! (Door windows not tinted).

Sound Bars

Pump up the music with these high fidelity Sound Bars from Rugged Ridge. Designed to fit directly behind the center hoop of all 87-06 Jeep® Wranglers and Unlimited vehicles, these Sound Bars are one stop 200 watt peak power "sound machines". The six speaker pre-wired bar features a 40-22,000 Hz frequency response. Outstanding midrange from a pair of 2" midrange speakers, thumping bass from the two 6.5" woofers and a pair of 1" tweeters for exceptional high frequencies make the Six Speaker Bar sing! The Two Speaker pre-wired speaker bar features a 100-20,000 Hz frequency response for dynamic sound quality. All Rugged Ridge Sound Bars include dual map lights and mounting hardware.

Rugged Ridge All Terrain Floor Liners for 1976-06 CJ & Wrangler

12975.11 Cargo Liner, 97-06 Wrangler

Easy to clean design; simply hose off and go!

OFFICIAL LICENSED PRODUCT

NEW! Licensed Jeep® Logo Cargo Liners And Floor Liners Now Available For 76-95 CJ7/8 & Wrangler

The only floor liner with patent pending "Deep Tread" Technology!

These floor liners are a totally new concept that combines all the best features of a deep rib floor mat and the 'old style' liners. Precision engineering using state of the art technology ensures an exact fit to the shape and contour of your vehicle's floor. The deeply molded Chevron-shape tread pattern channels dirt, mud and snow away from the driver to keep shoes and pant legs clean. It also contains the movement and sloshing around of any trapped water. The high perimeter wall offers a large footprint and maximum interior protection and containment. Unlike ordinary liners that utilize an inconsistent vacuum thermoform process and slippery lower grade plastic these liners are high pressure injection molded from OE-quality Thermoplastic that looks and feels like rubber and provides a nonslip surface. Raised ribs on the bottom provide maximum retention and keep the liner in place. The unique self-sealing floor hook attachment feature helps to prevent dirt and moisture from getting through. Easy to remove and clean. Simply hose them off and go!!! The mat actually reseals itself around the hook!!! Patent pending.

Rugged Ridge Overhead Storage Console

NEW!

The Rugged Ridge Overhead Storage Console is the storage solution you have been waiting for! It instantly turns the area underneath your top into usable storage space without any interference or modification to your vehicle. Works with soft tops, hardtops, the top up, or the top down. The Overhead Storage Console is a fully enclosed storage compartment that installs easily without any tools or drilling. It is constructed from durable blow molded High-Density polyethylene (HDPE), so it is safer and lighter than steel. A non-skid pad is adhered to the inside of the console to help keep your gear from sliding around, and a mesh storage net helps keep it safely stowed yet easily accessible. The console measures 41.5"x2.5"x6.5" and offers more than 450 sq. cubic inches of storage.

Replacement Center Consoles

Rugged Ridge Consoles are the ultimate storage solution for your CJ or early model Wrangler. Each console is constructed of durable Jeep® interior matching vinyl wrapped around plastic coated hard wood to keep moisture out and provide a great looking addition to your Jeep®. Each console is hand made to ensure a tight, wrinkle free finish. All Rugged Ridge Consoles feature a six can cooler, all mounting hardware and a dense foam arm rest for long life and a comfortable feel. Need lockable storage? No problem. All Rugged Ridge Consoles incorporate a locking mechanism to deter access to the storage compartments. Available in three unique styles and sizes, Rugged Ridge Consoles are the best storage solution available.

Rugged Ridge II Consoles feature dual adjustable cup holders, removable soft sided CD holder, two oversized storage areas, back seat cup holders and a rear map pocket.

Ultimate Locking Consoles feature dual front cup holders, removable CD tray, can cooler, coin storage tray and sunglass holder.

**Electronically Surged
Edge Will Not
Unravel**

Nothing refreshes the inside of a vehicle like new carpet. This **NEW** design provides Tufted Polypropylene carpet with electronically surged edges that will not unravel. Polypropylene is a space-age polymer chosen for its rugged durability and resistance to chemical solvents and mildew. Full interior design includes tailgate and wheel well coverage. Features jute backing and driver side vinyl heel guard. Thanks to the sound deadening properties of the carpet, interior noise will also be reduced. The precut six-piece design is made for your vehicle to ensure proper fitment. Available in three popular and attractive colors to match your Jeep's® interior.

Ultimate/Deluxe/Neoprene and Sport Grab Handles

Put easy to use Grab Handles wherever you need them. Constructed of tough nylon webbing with either a molded sure-grip handle (Ultimate), soft foam handle (Deluxe) or plain Nylon webbing (Sport). The Ultimate Grab Handles are available in two hot colors to accent the Jeeps® interior-Red & Black. Deluxe and Sport models fit all Jeep® roll bars and 3" roll cages with padding. Ultimate Grab Handles will fit 2" or 3" padded or un-padded roll bars. All designs are packed in pairs.

LED Mirrors & Heated Mirrors

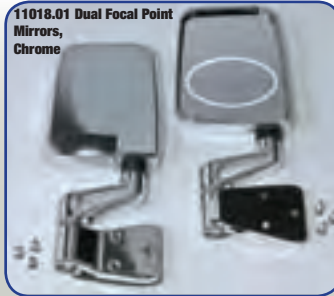

Looking to upgrade your current mirrors with the very latest features? Rugged Ridge offers a wide variety of special mirrors that offer you added features at economical prices. We offer heated mirrors, LED turn signal mirrors, Dual Focal Point mirrors and special mirror relocation brackets to place your mirrors on the vehicle if you remove your doors. Look to Rugged Ridge to offer the widest variety of replacement mirrors available for Jeep®. Special heating elements are incorporated into the mirror to quickly defrost your mirror during those cold winter days. The latest in mirror technology puts an LED light on the side of the mirror that turns on when you use your turn signal or parking lamps. This great feature lets the driver beside or behind you know you are turning. Mirrors available with heat, LED or BOTH! Some wiring and drilling required for installation.

Features & Benefits of the NEW XHD Seat Design

- Bolt-in solution for 03-06 TJ Wranglers!
- Durable powder coat painted welded interior frame to prevent interior seat rust and provide lasting comfort
- Special patent pending seat base design that allows for easy installation in all 97-06 Wranglers without any adaptor brackets! Saves you money, provides extra strength and provides true ease of installation!
- Each XHD Seat is designed to allow full functionality on 97-06 Wranglers. The unique design incorporates the factory front slider feature along with a built-in reclining mechanism for driver comfort. Only XHD Seating from Rugged Ridge® gives you these options on late model Wranglers!
- Heavy Duty seat base incorporates a CAD designed girder system which provides twice the strength of any other replacement seat on the market today. This new design is the most advanced seat base ever created in the last 30 years!
- Dense foam pack and heavy duty raised spring design creates a more comfortable seating experience. This new "comfort design" has been created to ensure seat longevity and comfort all in one package
- Four heat treated grade eight 7/16" side bolts attach the seat base to the seat back. This increased bolt size (most seats use 8 MM bolts) strengthens the seat back and meets DOT standards for use with late model (03-06 Wrangler) seat belt attachments
- Tough automotive grade vinyl or woven fabric (XHD Off-Road Seat) and matching stitch patterns provide a great look in your Jeep and tough "off road rated" performance.
- All lower seating areas have an expanded bolster area providing a wider seating area and more comfort. Wider bolsters also provide easier access/exit while entering and leaving the vehicle
- Dense foam pack and heavy duty raised spring design creates a more comfortable seating experience. This new "comfort design" has been created to ensure seat longevity and comfort all in one package
- A low profile seating surface along with not having to use adaptor brackets provides less steering wheel interference and more comfort. These seats have been specially designed for the true Jeep® enthusiast!
- Infinitely adjustable reclining mechanism lets you customize the seat recline position for the ultimate in comfort
- Each seat offers an industry leading 3 year limited warranty

XHD Reclining Seat

- Low cost seat replacement option. Style matches the original Jeep® look with horizontal stitching and infinite recline mechanism.
- Great entry level price point for the 97-06 Wrangler.
- Constructed of durable automotive grade textured vinyl and available in three factory matching colors: Gray, Black Denim, Spice.

XHD Replacement Seats for Wrangler 97-06

Finally a seating design that fits late model (97-06) Wranglers without the use of an add-on adaptor bracket. This revolutionary new patent pending design is the first true replacement seating up-grade in the last 30 years! By offering a model year specific program for late model Wranglers, the consumer only needs to purchase the replacement seat and not be bothered with those expensive add-on adaptor brackets. Furthermore, while developing these new designs, we up-graded specific components of the seats creating the most durable seating program on the market today. Now you can offer a complete replacement seating solution for all 97-06 Wranglers. The XHD seats, though they look similar, are an up-grade to our current designs.

XHD Ultra Seat

NEW!

- Our Full featured seat design with a removable and adjustable head rest.
- Expanded top and bottom side bolsters cradle the driver in comfort.
- Stylish racing design up-grades the look of any Jeep® interior.
- Constructed of durable automotive grade textured vinyl and available in four factory matching colors: Non-textured Black, Gray, Black Denim, Spice.
- Infinite recline mechanism.

Replacement Seating 76-02 CJ & Wrangler

Standard Replacement High Back Seats

Want all the strength and comfort of our reclining seat but without the recliner? Look no further! The Standard Replacement Seat from Rugged Ridge offers all the great quality benefits of our reclining seat but we have removed the reclining mechanism. This low cost alternative gives you the value and quality you are looking for, but is priced less. Also available in the Standard series is our Low Back Replacement Seat (on page 50). This seat is specially designed for those earlier Jeep® restoration projects and uses the original mounting hardware and bolts from the original seats.

13401.01 Standard Replacement High Back Set, Black

Factory Style Replacement Seat with Recliner

Replacement seating that reclines just like the original! All Rugged Ridge Seating is manufactured to exacting specifications to guarantee only the highest quality. Each seat is constructed of durable automotive grade vinyl that is designed to match your vehicles interior and all Rugged Ridge rear seats. All frames are powder coat painted and welded to make sure it can take those off-road adventures and years of open air use. The foam pack and spring system used on all Rugged Ridge Seats is extremely dense for long life yet soft enough for true comfort. Soft side bolsters "cradle" the driver making driving a pleasure. Each seat features an infinitely adjustable reclining mechanism to ensure proper driving position and the ultimate in comfort. All Rugged Ridge seats feature a stylish stitch pattern and original equipment bolt pattern for ease of installation and a great original equipment look. Simply remove the old seat and bolt in the new!

Seat Riser

Replace your worn seat risers or upgrade your current riser. They are designed for easy attachment of seat sliders (sold separately) which will attach to any aftermarket or OE Jeep® seat.

Seat Riser	Part #
Driver Side, 76-95 CJ/Wrangler, Each	13201.01
Passenger Side, 76-95 CJ/Wrangler, Each	13201.02

Replacement Seat Slider

Designed to be used with Rugged Ridge or factory seat risers, these heavy-duty sliders allow the seat to slide forward and back. Each seat slider is sold separately so you will need two, one for each front seat!

Seat Slider	Part #
Seat Slider 76-95 CJ/Wrangler, Each	13201.03

Seat Adapters

Required equipment for installing replacement seats on 97-02 Jeep® Wrangler vehicles. Designed for both Rugged Ridge and Outland replacement Jeep® seats.

Seat Adapters	Part #
Driver Side, 97-02 Wrangler	13201.11
Passenger Side 97-02 Wrangler	13201.12
*Not needed w/ XHD Seats	

* **WARNING:** Caution: replacement seating is offered for restoration or off-road use only. Replacement seats are provided by third party vendors and are not represented as meeting FMVSS standards.

Replacement Seating 76-02 CJ & Wrangler

The Super Seat

This might be the last seat you will ever own for your Jeep®! Luxuriously soft side and bottom bolsters cradle you in comfort while providing stability on those off-road trails. Each seat features an infinitely adjustable reclining mechanism to ensure proper driving position and the ultimate in comfort. The adjustable head rest is secured by dual steel rods and backed by a powder coat steel reinforcement plate that is surrounded by dense poured foam. The main structure is powder coat painted steel with heavy-duty suspension springs creating a rigid support frame. This frame is then surrounded by the best poured foam you can buy and wrapped in tough automotive grade vinyl fabric. Comfort, strength and stability all in one seat! As with all Rugged Ridge seating, all feature a stylish stitch pattern and original equipment bolt pattern for ease of installation and a great look. Simply remove the old seat and bolt in the new!

13404.37 Super Seat, Spice

The Sport Seat

Want that racing look at a great price? Look no further as the Rugged Ridge Sport Seat gives you both. This exciting new design features all the great quality features found on our factory replacement reclining seats but also has over sized bolsters for secure off-road driving comfort. Special cut-outs on the top of the seat give this seat that racing look and feel. The Sport Seat uses the original equipment bolt pattern for ease of installation.

13405.09

All Seats being installed on 97-02 Jeep® Wranglers require an optional front seat adaptor bracket: Drivers Side 13201.11 / Passengers Side 13201.12

⚠ WARNING: Caution: replacement seating is offered for restoration or off-road use only. Replacement seats are provided by third party vendors and are not represented as meeting FMVSS standards.

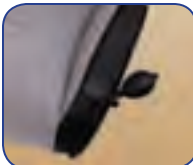

RRC Reclining Racing Seat

You have seen the rest, now here is the best! More features, more comfort, and the best pricing of any racing seat design. Each seat features dual reclining mechanisms allowing for infinite reclining positions. The special "Jeep® Specific" design uses ultra dense foam and steel construction for greater comfort and long life. Side bolsters have been slightly expanded and designed specifically for both lifted and non-lifted Jeep® vehicles. Special air adjustable lumbar support provides the most comfortable back support in a racing seat design. Woven fabric and vinyl construction give the ultimate in comfort and wearability. Each seat has three seat belt harness cutouts for use with a multi-point racing harness seatbelt. 1997-02 models require the Rugged Ridge mounting bracket for installation (shown below).

Rear Seating

Standard Low Back Seats

Want all the strength and comfort of our reclining seat but without the recliner? Look no further! The Standard Replacement Seat from Rugged Ridge offers all the great quality benefits of our reclining seat but we have removed the reclining mechanism. This low cost alternative gives you the value and quality you are looking for but is priced less. This seat is specially designed for those older Jeep® restoration projects and uses the original mounting hardware and bolts from the original seats.

Fold & Tumble Rear Seats

Need more rear storage space in the back of your Jeep®? Simply "fold and tumble" the Rugged Ridge Rear Fold and Tumble Seat and you create instant cargo space. Each seat is constructed of durable automotive grade vinyl that is designed to match your vehicles interior and all Rugged Ridge front seats. Each frame is powder coat painted and welded to make sure it can take those off-road adventures. The foam pack used on all Rugged Ridge Seats is extremely dense for long life yet soft enough for true comfort. Installation is easy with attachments to existing mounting points and minimal drilling required. Uses existing seat belts.

Protect your Jeep's® interior with these two great Seat Cover options: Custom Fit Neoprene Seat Covers or Custom Fit UV treated Poly Cotton Seat Covers, both from Rugged Ridge. These covers are constructed of either durable neoprene or tough poly cotton fabric creating the best looking custom seat cover available. Rugged Ridge does not use that cheap stretch nylon on their seat covers! Neoprene (wetsuit material) is a great fabric to protect your seats from dirt, water and whatever mother nature can throw at you. Poly Cotton is a great fabric to protect your seats from dirt, sweat and heat from the sun. No more burned legs from hot vinyl seats! Each cover is custom tailored for your Jeep's® original equipment seat style making your seats look like they have been recently re-upholstered. Installation is easy with special designed elastic cords, nylon straps and hooks that attach to your seat and to the seat cover mounting points. Available in black on black, grey on black, red on black (neoprene models only) and tan on black to complement virtually any Jeep® interior.

ALL WEATHER 12' CABLE REMOTE INCLUDED WITH ALL WINCHES

Rugged Ridge Synthetic Rope Performance Winches!

We have taken the high quality features of our regular winch and replaced the steel cable with genuine Dyneema SK-75 Synthetic Rope for a lighter weight, high performance winch option. The synthetic rope used on Rugged Ridge winches is custom designed for heavy duty use and combined with the included polished aluminum hawse fairlead and 12' hook, will provide the ultimate in pulling power.

Rugged Ridge 8,500 Synthetic Rope Winch- 11/32" x 100', Breaking Force 16,550lbs

- Constructed with Dyneema SK-75 fiber from the Netherlands.
- Same high strength fabric used in ballistic body armor.
- Significantly stronger than same diameter steel cable and up to 40% stronger than Kevlar.
- 1/7 the weight of the same diameter wire rope.
- Will not splinter, kink or curl like wire rope & floats in water.
- Specially coated to be resistant to UV, abrasions, and chemical solvents.
- Heavy Duty 11/32" 12-strand braid with a breaking force of 16,550lbs
- Hawse fairlead included

Why Synthetic Winch Rope?

Stronger and lighter, the two key elements of Synthetic Rope that make it the choice of competition off road vehicles everywhere. Rugged Ridge high strength synthetic Winch Rope is constructed from genuine Dyneema SK-75 fiber imported from the Netherlands. This revolutionary fiber is the choice of off-road enthusiast worldwide. It is stronger and lighter than wire rope and never kinks or splinters! Our synthetic line is woven from twelve UV-treated strands, resulting in increased strength, and a power to weight ratio unmatched by wire rope. Each synthetic rope comes with a protective sleeve that prevents it from over heating on the winch drum, black powder coated latched hook, stainless steel thimble, and is pre-terminated end for ease of installation. Synthetic rope does not store energy like steel cables, and in the event of a failure it is much less likely to result in severe injuries caused by the whiplash of broken wire rope.

- Significantly stronger than same diameter steel cable and up to 40% stronger than Kevlar.
- Same high strength fabric used in ballistic body armor.
- 1/7 the weight of the same diameter wire rope.
- Will not splinter, kink or curl like wire rope & floats in water.
- Protective sleeves keep line from overheating on winch drum.

Adjustable Tire Deflator Kit

Fully inflated tires are great for the road and gas mileage, but they deliver a washboard ride on the trail. Air down your tires for a softer ride and more tread grip. Rugged Ridge offers two great kits to fit your lifestyle and budget. Made from 100% brass and are fully adjustable in 3 psi. increments. Once you find your desired setting you can lock the deflators where they bleed to the same tire pressure each and every time they are installed. So, you can deflate your tires quickly before heading out on the trail.

Heavy Duty Tire Carrier Mount

If you have installed larger tires on your rig then a matching spare tire is a must. The problem comes when you try to bolt that new monster tire/wheel combo on your factory spare tire mount. Rugged Ridge has the answer with the HD Tire carrier Mount. The HD Tire Carrier Mount is constructed of heavy 1/4" steel plate and mounts to the tailgate. The tire is relocated two inches up and out from the old mount for larger tire clearance (Maximum tire size=35").

Heavy-Duty Tire Carrier & Spacer	Part #
Textured Black, 87-06 Wrangler, Each	11585.01

CAUTION: The tire carrier mount is designed to fit tires 35" in diameter or less.

Heavy Duty Tire Spacer

The Spare Tire Spacer bolts to your existing factory spare tire mount and relocates the tire two inches up and out. Both the HD Tire Carrier and Spare Tire Spacer feature 5x4.5" and 5x5.5" wheel bolt patterns and tough powder coated black textured finish.

Heavy-Duty Tire Carrier & Spacer	Part #
Textured Black 76-06 CJ/Wrangler, Each	11585.02

CAUTION: The tire carrier spacer is designed to fit tires 33" in diameter or less. Do not exceed these tire sizes

Gas Tank Skid Plates

The last thing you want to happen on a trail ride is to lose the only thing that keeps your engine running: gas. That's why Rugged Ridge has custom designed this Skid Plate to protect the gas tank on 1987-06 Wranglers. This overbuilt skid plate is a must for those who want that extra bit of protection for their off road adventures. Constructed of durable 3/16" thick powdercoated steel with a rust resistant E-Coating, this Skid Plate is designed to take whatever the trail throws at you! Bolt-on installation using existing frame mounting locations. This skid plate replaces the factory skid plate.

Heavy-Duty Differential Covers

Indestructible! You won't break these covers, we guarantee it. Made of 3/8" cast steel, painted black inside and out, these heavy-duty covers are designed to protect your differential and all its working parts for as long as you own your vehicle. These indestructible covers have been "44 caliber tested" - if they can take a bullet in point blank range (don't try this at home!), they can take all that the trail has to offer. Available for most popular Dana differential types and include extra reinforcement protection for the fill plug area. All mounting hardware and instructions are included for easy of installation.

Dual Battery Tray Kits

Outfitting a trail rig can add greater strain to the electrical system. Adding on a winch, air compressor, fog lights, driving lights, a spot light, electric fuel pump, and a stereo amp can really tax the battery. A great way to combat that strain is to install dual batteries. This is especially true when using a winch, which can draw big amps for an extended period. These kits are designed to mount two batteries in place of the factory single battery location. The trays and brackets feature a black powdercoated finish. These are mounting kits only and do not include any wiring. A suggested wiring diagram is included. 70-95 CJ & Wrangler kits place the batteries side-by-side and may be used with lead acid or cylindrical-style sealed gel cell batteries. 97-06 TJ Wrangler kits stack the batteries and are for use with cylindrical-style sealed gel cell batteries only due to the battery mounting direction.

DUAL BATTERY RELAY KIT

The Rugged Ridge Dual Battery Relay Kit is the perfect companion to the Rugged Dual Battery Tray. This relay kit allows you to connect two batteries to your electrical system. Because the last thing you want when your out of the trail or headed to the beach is a dead battery.

Hood Lift Kits

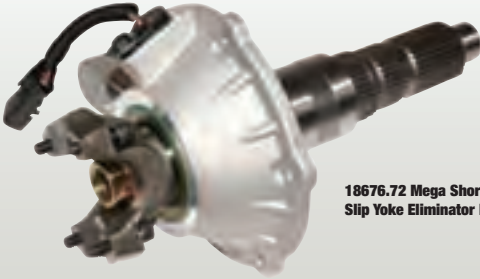

Eliminate the factory prop rod with a pair of gas charged hood lifts. This kit includes all the brackets and gas shocks needed to clean up the underhood appearance of your rig. This kit is also functional as the hood prop rod will no longer be in the way while working underneath the hood of your CJ or Wrangler. Easy installation.

Hood Lift Kit	Part #
72-06 CJ & Wrangler, Kit	11252.50

Transfer Case Slip Yoke Eliminator Kit/CV Drive Shafts

18676.72 Mega Short Slip Yoke Eliminator Kit

This kit is a MUST if you installed a 2" or taller suspension lift in your 1987-2006 Wrangler (not needed for body lifted Jeeps®). The kit fits all 1987 and up NP 231 transfer cases. A Slip Yoke Eliminator Kit (SYE) will eliminate the need to drop your transfer case in order to avoid drive train vibrations that are caused by taller suspension lift. The purpose of this kit is to replace the slip yoke portion of the NP 231 with a fixed yoke and CV-style drive shaft assembly. The Mega Short SYE (18676.72) is designed to be used in the same lift applications as the other standard SYE kit (2" and up). The main advantage to the new Mega Short SYE is that it allows for a much longer drive shaft to be used (additional 3"). This reduces drive shaft bearing angle, improves bearing & U-joint life, reduces driveline vibrations. It also has a shorter and stronger main shaft design with improved oiling. Will not work with cable driven speedometers. Not for use with Rubicon models.

18676.60 Slip Yoke Eliminator Kit

Transfer Case Slip Yoke Eliminator Kit	Part #
87-06 Wrangler Slip Yoke Eliminator (with NP231 transfer case) *, Kit	18676.60

97-06 Wrangler with 3.5"-6" Lift, Rear (for Mega Short SYE only), Each	16592.06

* NOTE: A CV equipped drive shaft will be required for this conversion kit.

16592.06 CV Equipped Drive Shaft for 97-06 Wrangler

WARNING: OEM slip yokes on 1987-2006 Jeep® Wrangler are not suitable for use with 2" or taller Rugged Ridge™ or other vendors' suspension lifts. Failure of slip yoke may result in damage to transfer case and/or loss of vehicle control. Use of this slip yoke eliminator kit is required for all suspension lifts 2" or taller. See additional product safety information and WARNINGS at back of catalog.

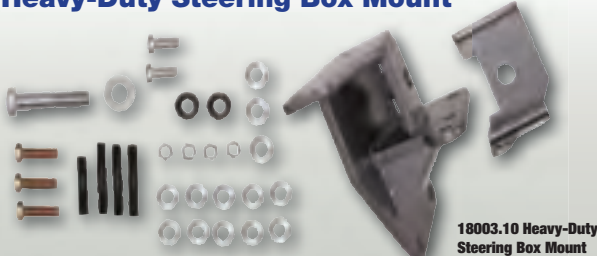

Lower Control Arm Mounts for 1997-06 Wrangler

Designed to replace and upgrade the weak OE front lower control arm mounts on 1997-06 Wranglers. These heavy-duty weld-on brackets provide a secure mount when driving off road. Greater wall thickness combined with a welded alignment cam provide extra support to the axle.

Lower Control Arm Mount	Part #

Heavy-duty design supports your steering box during those offroad adventures. Easy to install bolt on design.

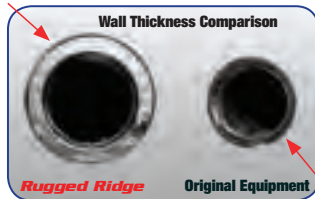

HD Steering Box Brace	Part #
76-86 Jeep® Each	18021.02

Heavy-Duty Steering Kits & Components

Beef up your ride with Rugged Ridge steering components. This is a bolt-on solution for preventing bent tie rods from wheeling with larger tires. The tubes are 1-3/4" ID SAE 1018 steel that is cold rolled, pierced, and drawn through dies to produce a wall thickness of 1/4". This is true DOM tubing with no seams or welds to fail. Heavy-duty 7/8" rod ends feature standard tapered ends to fit stock knuckle applications. You get one ton strength without any modifications to your steering knuckles. The Heavy-Duty Crossover Steering Conversion Kit replaces the bump-steer prone inverted Y-type steering system. This kit connects the drag link to the end of the tie rod at the wheel, giving a better steering angle and better leverage. If your vehicle is lifted a crossover steering system is a must!

RRC Tubular Flat Fenders

These over-built tubular fenders were designed for maximum suspension articulation while still maintaining a factory-style inner fender liner. Tough 0.120" wall tube is attached to 1/8" steel plating for one tough fender design. RRC Tubular Flat Fenders are direct factory replacements with a built in full fender liner (some drilling may be required) allowing for all factory engine accessories to be mounted by using the factory mounting hardware. Fenders are packed in pairs, primed for paint. Though these flares cover most tires, they are designed for offroad use and additional flare coverage may be needed for onroad use in some states. Two unique styles to choose from: Basic model requires greater installation (drilling) and more sheet metal work before painting. It also includes the side marker light housing. Upgrade model bolts directly on using factory inner liner has ground welds and is ready for paint. The upgrade version does not include the side marker light housing and is designed for offroad use only.

HD Clutch Link Kit

NEW!

Replaces the factory style L-bracket with retainer clip clutch rod with an up-graded spherical rod design. Allows for full clutch engagement during heavy body and frame flex situations while off road, where the factory design has tendencies to bind not allowing you to get into gear. Also can be used with up to 3" body lifted vehicles replacing the shorter factory clutch rod.

HID Lighting

We mated the brilliance of High Intensity Discharge bulbs with the rugged construction of our traditional halogen off road lights. The result is a more efficient and powerful beam better capable of illuminating the night sky. HID lights are 2½ times more powerful than halogen lights and draw 60% less current than a standard 100W fog light. Our 6" and 5" HID Lights are constructed with heavy duty stamped steel housings, and are available in corrosion resistant black or stainless steel finish. Rugged Ridge lights feature waterproof connections, internal ballast, and a reinforced multi-directional mounting base. The lights are available individually or in kits containing a pre-terminated wiring harness, relay, impact resistant stone guards and illuminated dash switch.

- 5", 6", 7" HID light assemblies available.
- 12V 35W 4200K HID Bulb.
- Internal ballast - no external ignition ballast to install.
- 2½ times more powerful than halogen bulbs.
- Draws 60% less current than a standard 100W fog light.
- HID Lights include impact resistant stone guard.
- The average life of an HID bulb is 2000 hours, compared to 500-1000 hours for a halogen unit.

Lights are available individually.
All include impact resistant stone guards

All HID lights are available in 3 packs for use with Rugged Ridge Light Bars

Halogen Off Road Lighting

Designed, engineered, and tested to stand up to the rigors of off road use, our lights are constructed with heavy-duty stamped steel housings, and crystal glass lenses set in shock absorbent weatherproof rubber gaskets. The brilliant 12V 100 watt halogen bulbs slice through fog, rain or snow to help illuminate the road even under the toughest conditions. Available in Round, Rectangular and Slim housings in either a black or stainless steel finish to best suit your application. Slim lights feature a narrow profile just 2 13/16" thick! This sleek design allows them to be mounted in places most lights won't fit. They are perfect for windshield and grille mount light systems. The lights are available individually or in kits containing a pre-terminated wiring harness, relay, impact resistant stone guards (white stone guards with stainless, black with black) and illuminated dash switch.

Crystal H2 Conversion Headlight

Replace your old sealed beam bulb headlights with these Crystal H2 Conversion Headlights. This two-piece headlight and bulb is brighter, more economical and environmentally friendly than a conventional sealed beam headlight. The functional two-piece design allows you to replace the bulb without discarding the housing. The headlights feature a crystal clear poly carbonate lens, and a die cast aluminum reflector for maximum light disbursement. The H2 55/60 watt headlight plugs directly into your OE wiring harness. The headlights and bulbs are SAE / Dot compliant.

Front Bumper Light Bars

Rugged Ridge has engineered a durable and easy to install light bar that allows you to add auxiliary lighting to your factory Wrangler bumper. The light bar bolts to existing mounting holes and installs easily without cutting, drilling, or removing the bumper. With a few simple hand tools you will be able to install your light bar and mount up to three lights on your Jeep® while retaining your factory bumper. Lights not included.

Rugged Ridge Catback Exhaust Kits for 2000-06 Wrangler

Open up your Jeep's® exhaust with this great

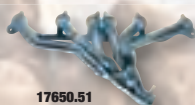

looking stainless steel catback exhaust system from Rugged Ridge. Rugged Ridge catback exhaust kits are manufactured from mandrel bent, T304 stainless steel that has been polished to a mirror finish. They feature a precision TIG welded muffler with reinforced inlets and outlets, and a deep throaty sound. The 2-1/4" mandrel bent pipes increase performance and provide exhaust gases a smooth exit from though looking slant cut exhaust tips. This is a bolt-on system that installs after the catalytic converter to keep you emissions legal. Dyno results show typical horsepower gains of over 10 horsepower, or you can use in conjunction with our cold air intake for even more power! Rugged Ridge Catback Exhaust: Great Sound. Better Performance.

Rugged Ridge Headers

These high quality Rugged Ridge headers are available in four finishes: polished 304 stainless steel, non-polished 409 stainless steel, high temperature metallic black ceramic and black painted for a long operating life. Flanges are welded 360 degrees to stand up against the hottest conditions. Our ceramic coating look great and protects against corrosion & thermal fatigue while increasing horsepower and extending the life year of header. Ceramic headers retain heat better than their chrome or stainless counterparts. Retaining exhaust heat improves air density in the cylinder head's combustion chamber for enhanced air flow. This improved flow increases the exhaust gas exit velocity, and cuts down on your under hood temperature, resulting in performance gains. Each complete kit includes manifold, gasket, hardware and down pipe flange gasket and is backed by a three year limited warranty against corrosion. All models use the factory head pipe. The complete bolt on kit includes manifold, gasket, hardware and down pipe flange gasket. All Rugged Ridge headers come with a 3 Year Warranty.

Cold Air Intakes & Throttle Body Spacer

Cold Air Intakes for Jeep®

17750.01 for 1997-06 Wrangler 4.0L

- Polished mandrel bent 6063 aluminum air intake tube.
- Simple no-drill installation bolts on using simple hand tools.
- Includes a high-flow conical dry panel filter that never needs oiling.
- Intake kit includes black powder coated heat shield
- Part # 17750.01 for 97-06 4L wranglers include a throttle Body Spacer as a part of the kit.
- Improves fuel economy up to 10%*
- Adds up to 10HP and 12ft lbs or torque**

Want more horsepower, better throttle response, and improved acceleration?

A Rugged Ridge Cold Air Intake System can boost your performance, while helping you keep extra cash in your wallet. Our polished aluminum mandrel bent intake tube replaces the restrictive factory air box to help improve fuel economy. A black powder coated heat shield separates the filter from engine heat, dirt and debris, as cold air is drawn through a high-flow conical air filter. Unlike other reusable air filters, our dry panel design never needs oiling, which keeps your mass airflow sensor from being damaged by excess oil! The simple bolt on installation gives you power you can feel, adding up to 10HP and 12ft lbs or torque, depending on application.

** Depending on kit

Throttle Body Spacer

The Rugged Ridge Throttle Body Spacer raises the throttle body 1" above the intake manifold. The lift helps optimize power and performance by drawing in colder denser air. The large bore design allows your system to inhale a larger volume of air producing more horsepower and torque. It features solid aluminum construction with a slick anodized black finish, and is a bolt on performance adder for both 4.0L and 2.5L engines. (included in cold air kit 17750.01)

- Solid Aluminum Construction.
- Simple no-drill installation bolts on using simple hand tools.
- Includes mounting hardware, gaskets and spacers.
- Black Anodized Finish.
- Fits 91-06 Wrangler 4.0L & 91-02 2.5L

Synthetic Air Filter

Unlike other reusable air filters, our dry panel design never needs oiling, which keeps your mass airflow sensor from being damaged by excess oil! Rugged Ridge performance high flow filters are made from a synthetic fabric and not cotton. Cotton filters are made porous and must be oiled to trap dirt and debris. But that oil reduces air flow through the filter and it can become easily clogged.

Our filters are woven from synthetic fabric to allow maximum air flow and particulate filtration. Because our filters never need oiling, they can be cleaned easily with water instead of degreaser, reducing the cost of maintaining the filter over the lifetime of your vehicle. No oil = No fuss, no mess and improved performance!

Designed by a dedicated team of Jeep® enthusiasts, the ORV suspension program is one of the most complete programs available. We have looked at each application in detail to provide the very best and most complete solution for your Jeep®. Since we focus the large majority of our attention on Jeep® vehicles, we know the ins and outs of what the best lift solution is depending on your individual needs. Below is a quick reference guide on the ORV program to make it easier to choose the lift you need for your particular need. Remember, all ORV Kits with shocks include a pair of neoprene wrapped grab handles and an Off Road Organizer for your glove box! **Welcome to ORV™ by Rugged Ridge!**

A Few Words About Product Safety.

Your safety and the safety of other motorists is very important. Your Jeep® is an off road capable vehicle that readily lends itself to restoration and customization. In considering modifications to your Jeep's® suspension you are the person choosing the combination of suspension, wheels, tires, drive train and accessories that best fit your intended use. Likewise, you are the person responsible for the safety and legality of the vehicle you modify. In modifying your vehicle's suspension, balance your desired off road capabilities against how the vehicle may actually be used off road and on road.

It is not practical or possible to warn about all hazards associated with your Jeep® or modifying your suspension for improved off road capabilities. Start by familiarizing yourself with all vehicle manufacturers' instructions, warnings limited warranties and the instructions and warnings accompanying your aftermarket product.

To help you make informed decisions about safety, this catalog and the instructions accompanying our products have provided certain information in the form of "Notices" and "Warnings". This information alerts you to potential hazards that could hurt you or others.

▲ NOTICE This is a caution against anything which may cause damage to the vehicle or its equipment if the caution is ignored. The Notice includes information about how you can avoid or reduce those risks.

▲ WARNING This is a signal telling you that you CAN BE KILLED or SERIOUSLY HURT if you don't follow the Warning. The Warning includes information about what you must or must not do in order to reduce the risk of injury to yourself and others.

▲ CAUTION This is a signal telling you that you or others CAN BE HURT if you don't follow the instruction. The Caution includes information about how you can avoid those risks.

Modifying the suspension of your vehicle to improve off road capabilities involves certain risks. The modified vehicle may handle differently than as factory equipped including increased ride-height; reduced lateral stability and risk of roll-over or other accident. Also, owner's choice of larger tire and wheel combinations may require additional braking force or increased stopping distances.

- Failure to drive this vehicle safely may result in serious injury or damage. Avoid sharp turns or abrupt maneuvers. Do not drive the vehicle under any speed or maneuvering conditions which may cause the vehicle to trip, roll, lose traction or compromise your ability to safely brake in an emergency.
- Familiarize yourself with all vehicle manufacturers and Rugged Ridge™ warnings, instructions and limited warranties before driving this modified suspension vehicle.
- Follow recommended maintenance procedures and routinely inspect your vehicle components for unusual wear or off road damage.
- Rugged Ridge™ does not recommend combined use of body lifts with suspension or other lift devices or modification, alteration or fabrication of any Rugged Ridge™ suspension product to achieve additional lift. Also be aware that most states have restrictions on height modifications for vehicles used on road. Consult your vehicle owners manual, limited warranties, the instructions and warnings accompanying this product and state law before undertaking these modifications or using your modified suspension vehicle on road. A summary of current regulations affecting modified suspension vehicles is available from www.SEMA.org.
- Always wear seat belts and/or appropriate off road restraints, reduce your speed, tread lightly[®] and safely enjoy your off road vehicle.

KNOW YOUR KITS: Though there are many ways to provide extra lift for your Jeep®, ORV recommends the following lift options as the best way to Lift your Jeep®:

Poly Spacer Kits: Available for Coil Spring Jeep® Wranglers from 97-06

Coil Spring Kits: Available for Jeep® Wranglers from 97-10, 93-98 Jeep®

Leaf Spring Kits: Available for Jeep® CJ/Wrangler from 55-95

LIFT OPTIONS EXPLAINED:

- Poly Spacer Kits** - Used for small lifts, these low cost lifts are designed for on road/light off road use only and incorporate the factory coil springs. With the addition of spacers, the ride of your Jeep® will be stiffer than original and provides very little articulation when off road. Bump stops (also called blocks) should always be a part of the kit as you will be using the factory springs. Without the bump stops your spring could over compress. These situations can cause a rebound rate that is too great causing a potential mishandling situation or damage your suspension. This method of lifting is the low cost/lower performance solution to lifting your Jeep® vehicle.

- Coil Lift Kits** - Used for medium to large lifts, these lifts are designed for on road and moderate to severe off road use. Coil Spring Kits provide the best way to give extra lift and still maintain OE ride characteristics. The 2" - 4" kits should offer new springs and extended Bump Stops as listed above as well as rear track bar bracket/brace to ensure proper centering of the axle and a secure fit. On 4" kits, it is important have front sway bar disconnects. These important disconnects will provide much more articulation when using your Jeep® off road.

- Leaf Spring Kits** - Used for all Jeep® CJ/Wrangler vehicles from 1955-1995, these heavy-duty lifts provide a fairly straightforward lift option. The key to any leaf spring lift is the leaf spring itself and prices will vary greatly depending on quality and features. Key "must-have" features that will provide the best ride include: 1.) Teflon inserts between each leaf. These inserts allow each leaf to move independently creating a better ride both on and off road. 2.) Leaf springs should be held together with roller clips and not cinch clips. This method of securing the leaf springs together is more expensive but dramatically improves the vehicles ride and off road performance. 3.) Make sure your leaf springs have built-in degree wedges to help with pinion angle issues. Plus by having a degree wedge already attached, installation of the kit will be easier and there are no extra parts to purchase.

18415.33 Poly Spacer Kit

18415.31 Coil Lift Kit

18415.20 Leaf Spring Kit

Coil Spring Kits

All ORV springs are set to original factory rates. Provides a better ride both on and off road.

All ORV springs are constructed of 5160H hot rolled bar, keeps its memory so the spring will not sag.

All ORV coil springs are powder coated, E-coated 5/8" coil for long life and strength.

Poly Spacer Kits

Coil spring spacers are made from high density polyurethane.

Rugged Ridge bump stops are firmer than stock stops for more suspension control.

All ORV leaf springs have built in degree wedges to help correct pinion angle.

Leaf Spring Kits

All late model CJ/Wrangler ORV leaf springs use a roller clip to improve ride.

All ORV leaf springs are powder coated, shot-peened steel, reducing leaf fatigue. This treatment ensures the leaf springs will last longer

All ORV leaf springs have Teflon pads in between each leaf for maximum travel and a better ride.

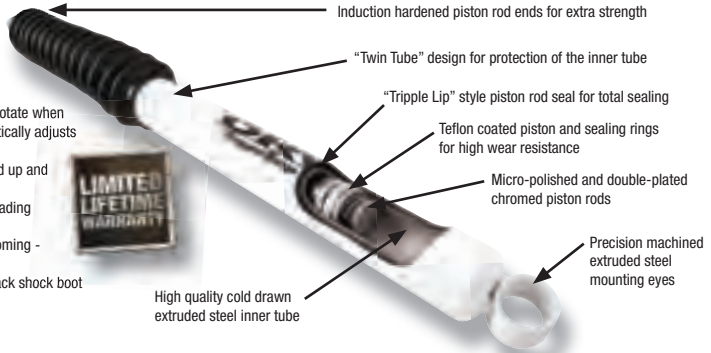

All ORV leaf springs are pre-assembled and set to factory flex rates.

ORV SHOCKS

ORV only uses nitrogen charged gas shocks for all their kits. Though a little more money, the nitro gas shock in combination with the ORV kits provide a better ride both on and off road. By using an ORV lift kit and matching gas shocks, you optimize the suspensions capabilities giving you a better ride both on and off road. Another advantage to Nitro gas shocks is their ability to prevent body roll. This is extremely important, as body roll will kick in the ESP sensors on later model Jeeps®, which will shut the vehicle down.

ORV shock features include:

- 150 PSI pressurized Nitrogen gas
- Internal valving - the internal orifice will rotate when the piston moves more than 2" - automatically adjusts to make the ride as smooth as possible
- Twin tube construction to lower heat build up and protect the shock from off road obstacles
- Constructed to ORV specifications by a leading Shock manufacturer
- Bonded iron 14mm piston with extra chroming - provides for a longer, rust free life
- Includes polyurethane bushings and a black shock boot
- Limited lifetime warranty on the shocks

ORV STEERING STABILIZERS

ORV recommends upgrading your current steering stabilizer or adding a stabilizer on all lifted Jeep® vehicles. The ORV Steering stabilizer dampens out the roughness of the highway and the vibration from running larger tires and wheels. ORV Gas Stabilizers also make it easier to move those larger tires and wheels both on and off road. These noticeable handling improvements are well worth the small investment!

1997-2006 Suspension Kits

What to Buy:

When looking at which kit is best for your application you need to determine two important things: size of tire and use of vehicle. On the 97-06 Wrangler TJ, 2" spacer lifts are designed for a larger tire than factory and light off road use. The 2" coil kit is designed for a larger tire and moderate off road use. The 4" coil kit is designed for more severe off road use and up to a 34" x 12.5" x 15" tire.

ORV Coil Spring Lift Kits Feature:

- Get off road performance while not sacrificing on road ride! This kit will provide as close to factory as you can get while providing off road articulation.
- Includes four powder coated, E-coated 5160H hot rolled bar, 5/8" coil springs that are set to original factory rates. By using 5160H hot rolled bar, ORV springs keep their memory eliminating any possibility of future sag.
- By setting the coil springs to factory rates, you get the best on road ride possible and the ability to use a larger tire.
- ORV uses tough, over built extended control arms for added strength and higher performance. Each arm has a beefy 3/16" wall thickness and each end is tapered before welding; this extra heavy-duty design ensures a long life, both on and off road.
- In most cases control arms are longer than factory to adjust for caster. This is not always true for other brand lifts! Each arm bushing can be easily greased without removing the arm from the vehicle.
- Each 2" Coil Spring Lift Kit includes 1" transfer case lowering brackets. These are not spacers but full-length brackets that actually solidly secure your transfer case. ORV uses these brackets rather than spacers as spacers can create flex therefore putting undue stress on the drive line.
- Each 4" Coil Spring Lift Kit includes 1.5" transfer case lowering brackets. These are not spacers but full length brackets that actually "true" your transfer case. ORV uses these brackets rather than spacers, as spacers can create flex therefore putting undue stress on the drive line.
- Kit includes two sway bar disconnects for more off road articulation.
- Due to the changed pinion angle, we highly recommend a new drive shaft and a slip yoke eliminator kit be installed when using any 4" or greater lift kit on a 1997-2006 Wrangler/Unlimited.
- All 4" Kits will require the purchase of a drop pitman arm to ensure proper steering geometry (sold separately).
- All ORV Kits with shocks include a pair of Neoprene Wrapped Grab Handles and an Off Road Organizer for your glove box!

97-06 Wrangler, 04-06 Wrangler Unlimited

97-06 Wrangler with 3.5"-6" Lift (for Mega Short SYE only)	16592.06

Need some extra clearance for your oversized tires? This all new Rugged Ridge body lift includes everything you need to fit up to 33" diameter tires. By allowing a taller tire you'll get that extra ground clearance you need when facing off road obstacles.

3" Body Lift

Part

97-06 Wrangler with automatic, 97-04 5-speed or 6-speed transmission, Kit	18303.11
97-04 Wrangler with 5-speed, 97-06 Wrangler with automatic transmission, Kit	18303.10
Upgrade kit for all Wrangler with 6-speed manual transmission, Kit	18303.20
(18303.10 + 18303.20 = 18303.11)	

Body Lifts for 1997-06 Wrangler

18303.11 Body Lift Kit, 1997-06 Wrangler

Rugged Ridge™ does not recommend combined use of body lifts with suspension or other lift devices or modification, alteration or fabrication of any Rugged Ridge™ product to achieve additional lift. See additional product safety information and WARNINGS on page 78.

1955-95 CJ/Wrangler

18415.08

Got flex?

18401.20

What to Buy:

When looking at which kit is best for your application you need to determine two important things: size of tire and use of vehicle. On the 1976-95 CJ/Wrangler, the 2" - 2.5" Leaf Spring kits are designed for a tire size up to 31" and moderate off road use. The 1955-95 CJ/Wrangler 4" Leaf Spring kits are designed for more severe off road use and up to a 33" x 12.5" x 15" tire.

ORV™ Leaf Spring Lift for 1955-1995 CJ / Wrangler

- Get off road performance without sacrificing on road ride! These kits provide as close to a factory ride as possible.
- Includes 4 powder coated, shot-peened leaf springs with Teflon inserts and pre-installed degree wedges.
- Each leaf spring has Teflon between each leaf for a factory ride, better performance.
- Pre-installed degree wedges provide ease of installation and no more parts to buy. These wedges help to correct any pinion angle issues that may arise due to the lift.
- By shot-peening the leaves before assembly, it assures that the leaf springs will not sag over time.
- All ORV U-bolts are grade-8 and E-coated to ensure they will be able to take off road abuse.
- Due to the changed pinion angle, we highly recommend a new drive shaft and a slip yoke eliminator kit be installed when using any 4" or greater lift kit on a 87-95 Wrangler (see below).
- All 4" Kits will require the purchase of a drop pitman arm to ensure proper steering geometry (sold separately, see below).
- Note: Actual lift height is dependent on specific Jeep® characteristics and additional parts being put on the vehicle (bumpers, winch, hard tops, soft tops etc.).
- ORV kits with shocks include a pair of Neoprene Wrapped Grab Handles and an Off Road Organizer!

Application:	Kit w/o Shocks	Kit w/ Shocks	Max Tire Size HxWxD	Max Wheel Offset	Est. Install Time
87-95 Wrangler, 2"-2.5" Lift	18401.20	18415.20	31"x10.5"x15"	3.75"	4 Hrs.
87-95 Wrangler, 4" Lift*	18401.25	18415.25	33"x12.5"x15"	3.75"	6 Hrs.
76-86 CJ5, CJ7, CJ8, 2"-2.5" Lift	18401.08	18415.08	31"x12.5"x15"	3.75"	4 Hrs.
76-86 CJ5, CJ7, CJ8, 4" Lift*	18401.15	18415.15	33"x12.5"x15"	3.75"	4 Hrs.
55-75 CJ5, CJ6, 4" Lift*	18401.14	18415.14	33"x12.5"x15"	3.75"	4 Hrs.

* 87-95 Wrangler 4" Lift see SYE kits & CV driveshafts on page 78.
* 72-76 models will require a drop pitman arm. Sold separately. (See below)

18401.20 Kit includes: (4) leaf springs, (8) U-bolts, hardware kits.

18401.25 Kit includes: (4) leaf springs, (8) U-bolts, hardware kits, (2) track bar extension brackets.

18401.08/.15 Kit includes: (4) leaf springs, (8) U-bolts, hardware kits.

18401.14 Kit includes: (4) leaf springs, (8) U-bolts, hardware kits.

⚠️ WARNING: WARNING: See page 75 for important safety information.

Pair, Leaf Spring, ORV Suspension, Shaft Diameter: 5/16-In. Length: 50mm	18382.50

Drop Pitman Arms

Lifting a vehicle takes more than just slapping on taller springs. The stock steering linkage is designed for use with the stock height suspension. The steering linkage angles of a lifted vehicle are more extreme and influenced by suspension travel. This drop pitman arm helps reduce the angle of your drag link and reduce bumpsteer created when a suspension lift is installed.

ORV™ SUSPENSION SYSTEMS BY RUGGED RIDGE™ LIMITED LIFETIME WARRANTY

Your Omix-Ada® /Rugged Ridge™ product is covered by the Lifetime Limited Warranty explained below that gives you specific legal rights. This limited warranty is the only warranty Omix-Ada® /Rugged Ridge™ /ORV™ makes in connection with your product purchase. Parts sold by Omix-Ada® or Rugged Ridge™ but supplied by other vendors are exclusively warranted by the vendor supplying the part. Omix-Ada® neither assumes nor authorizes any vendor, retailer or other person or entity to assume for it any other obligation or liability in connection with this product or Limited Warranty.

What is covered? Subject to the terms, exclusions and limitations herein and with respect only to products first sold in the United States, Omix-Ada® warrants to the initial retail purchaser only that its Rugged Ridge™ suspension kits, and ORV™ shocks and stabilizers shall be free of defects in material and workmanship for so long as the initial retail purchaser owns the vehicle on which these products were originally installed. All other express or implied warranties are hereby disclaimed. Your warrantor for these parts is Omix-Ada®, Inc., 460 Horizon Dr., Suite 400 Suwanee, GA 30024. Omix-Ada® reserves the rights to: (a.) require proof of purchase as a condition of this Limited Warranty, (b.) make future revisions to its Limited Warranty without prior notice.

What is not covered? Your Omix-Ada® /Rugged Ridge™ /ORV™ Limited Warranty does not cover any Rugged Ridge™ /ORV™ suspension systems that are used or combined with non-ORV™ suspension components. Furthermore, ORV™ suspensions not installed with ORV™ or other recommended shock absorbers may void the Limited Warranty. Products that wear out or fail due to the use of larger tires or wheels are not covered by this Limited Warranty. Your Omix-Ada® Limited Warranty further does not cover products or parts supplied to Omix-Ada® by outside vendors or products, parts or vehicles Omix-Ada® determines to have been damaged by or subjected to:

- Installation damage, alteration, modification or failure to maintain.

- Normal wear and tear (bushings, tie-rod ends, etc.). Scratches or defects in product finishes (powder coating, plating, etc.) or damage due to shipping.
- Damage arising or related to non- Omix-Ada® /Rugged Ridge™ /ORV™, including but not limited to any vehicle's electronic stability system, related components or other vehicle systems.
- Racing or other vehicle competitions or contests. Accidents, impact by rocks, trees, obstacles or other aspects of the environment.
- Theft, vandalism or other intentional damage.
- Products used in application other than those recommended in the current /Rugged Ridge™ /ORV™ catalog or the instructions accompanying your Rugged Ridge™ /ORV™ product.

Remedy Limited to Repair / Replacement. The exclusive remedy provided hereunder shall, upon Omix-Ada® inspection and at Omix-Ada's® option, be either repair or replacement of product or parts covered under this Limited Warranty. Customers requesting warranty consideration on Omix-Ada® branded parts (including Rugged Ridge™ and ORV™) should first contact the independent distributor from whom you purchased your part to obtain a Returned Goods Authorization number. All removal, shipping and installation costs are customer's responsibility. Customers requesting warranty consideration on non-Omix-Ada® branded parts should refer to the manufacturers' Limited Warranty and contact them directly. If a replacement part is needed before the Omix-Ada® part can be returned, you must first purchase the replacement part. Then, if Omix-Ada® deems the part warrantable, you will be credited the purchase price.

Other Limitations - Exclusion of Damages - Your Rights Under State Law

- In consideration of the purchase price paid, neither Omix-Ada® nor any independent Omix-Ada® distributor/licensee are responsible for any time loss, rental costs, or for any incidental, consequential, punitive or other damages you may have or incur in connection with any part or product purchased. Your exclusive remedy hereunder for covered parts is repair/replacement as described above.

- This Limited Warranty gives you specific rights. You may also have other rights that vary from state to state. For example, while all implied warranties are disclaimed herein, any implied warranty required by law is limited to the terms of Limited Warranty described above. Some states do not allow limitations of how long an implied warranty lasts and /or do not allow the exclusion or limitation of incidental or consequential damages, so the limitations and exclusions herein may not apply to you.

Drivetrain Engineering Perfected

Are you looking for an axle and pinion rugged enough to match your off the beaten path sense of adventure? Alloy USA® axle shafts and Precision Gear® ring & pinions have been propelling muscle cars, trucks and four wheel drive vehicles down highways, drag strips, back roads and over the world's roughest terrain for nearly a decade. With the recent asset and intellectual property purchase of Alloy USA® and Precision Gear® by Ultra Axle LLC, an affiliate of Omix-Ada® Inc., these two brands are now backed by an industry leader, financially strong company that will be there for you in the long haul. As a member of the Omix-Ada® group of companies Alloy USA® and Precision Gear® will provide the service and support you demand! The dedicated team of Alloy USA® and Precision Gear® engineers have developed, tested, raced and trail ridden each of our products until they were perfected. We marry the mechanics of engineering with the art of manufacturing to produce the finest in drivetrain solutions. High tensile strength 4340 Chromoly is heat-treated, tempered and induction hardened to produce these heavy-duty axles that are up to 40% stronger than stock. We use the latest splining technology to produce splines that are stronger than traditional cut splines. The shafts are then precision CNC machined and magnaflux inspected for cracks before receiving the Alloy USA® logo and a slick black anodized or natural finish.

Why have we put so much time and energy into developing our Axle Shafts and Ring & Pinions? Because horsepower is useless if you can't get it to the ground. We take pride in engineering solutions and prove it by backing each product with an industry leading warranty. Each axle is covered by our exclusive 10-year limited warranty and each ring and pinion is covered by a 5-year limited warranty so you can drive with confidence!

WELCOME TO THE ALLOY USA® & PRECISION GEAR®!

THE BEST WARRANTY IN THE BUSINESS

Alloy USA®/Precision Gear® Limited Warranty

Your Alloy USA® or Precision Gear® product is covered by the Limited Warranty explained below that gives you specific legal rights. This limited warranty is the only warranty Ultra Axle® LLC (the distributor/warrantor of these products) makes in connection with your purchase. Ultra Axle® LLC neither assumes nor authorizes any vendor, retailer or other person or entity to assume for it any other obligation or liability in connection with its products or Limited Warranty.

What is covered? Subject to the terms, exclusions and limitations herein and with respect only to products first sold in the United States, Ultra Axle® LLC warrants to the initial retail purchaser only that products sold under its Alloy USA® and Precision Gear® trademarks including Axle Shafts, Ring and Pinions, Installation Kits, Jeep® Overhaul Kits, Alloy USA® X Joints and Differential Covers shall be free of defects in material and workmanship for the Limited Warranty term/duration described below. This Limited Warranty shall be measured from the date of initial retail purchase, extends only to the initial retail purchaser and is not transferable. All other express or implied warranties are hereby disclaimed. Your warrantor for these parts is Ultra Axle® LLC, 460 Horizon Dr., Suite 400 Suwanee, GA 30024 (770/614-6101). Ultra Axle® reserves the right to: (a) require proof of purchase as a condition of this Limited Warranty, (b.) make future revisions to its Limited Warranty without prior notice.

Duration of Limited Warranty by Product Line

Alloy USA®, front and rear axles- **10 Year Limited Warranty**

Precision Gear® and Alloy USA® Ring and Pinions- **5 Year Limited Warranty**

Jeep® Overhaul Kits, Alloy USA® X Joints, Tube Seals and Differential Covers- **3 Year Limited Warranty**

What is not covered: Your Alloy USA®, Precision Gear® Limited Warranty does not cover damage or claims to any component, vehicle or person other than Alloy USA® or Precision Gear® parts purchased by the initial retail purchaser. Your Alloy USA®, Precision Gear® Limited Warranty does not cover damage or claims to any component, vehicle or person Ultra Axle® LLC determines to have been damaged by or subjected to:

- Installation damage, alteration, modification, misuse or failure to maintain.
- Products used in application other than those recommended in the current Alloy USA®/Precision Gear® catalog or the instructions accompanying your Alloy USA®/Precision Gear® product.
- Normal wear and tear/product life deterioration, scratches or defects in product finishes (powder coating, plating, etc.) or damage due to shipping.
- Damage arising or related to non- Ultra Axle® LLC products including but not limited to any vehicle's electronic stability system, related components or other vehicle systems.
- Accidents, impact by rocks, trees, obstacles or other aspects of the use environment.
- Theft, vandalism or other intentional damage.

Remedy Limited to Repair / Replacement. The exclusive remedy provided hereunder shall, upon Ultra Axle® LLC inspection and at Ultra Axle® LLC option, be either repair or replacement of the Ultra Axle® LLC parts covered under this Limited Warranty. Customers requesting warranty consideration should first contact the independent distributor selling your part to obtain a Returned Goods Authorization number. All removal, shipping and installation costs are customer's responsibility. If a replacement part is needed before the Ultra Axle® LLC part can be returned, you must first purchase the replacement part. Then, if Ultra Axle® LLC determines the part warrantable, you will be credited the purchase price of that part.

Other Limitations - Exclusion of Damages - Your Rights Under State Law

- In consideration of the purchase price paid, neither Ultra Axle® LLC nor any independent distributor are responsible for any loss of use or time, rental costs, or for any incidental, consequential, punitive or other damages you may have or incur in connection with your vehicle or any Ultra Axle® LLC product. Your exclusive remedy for your Ultra Axle® LLC parts covered hereunder is repair/replacement as described above.
- This Limited Warranty gives you specific rights. You may also have other rights that vary from state to state. For example, while all implied warranties are disclaimed herein, any implied warranty required by law is limited to the duration and other enforceable terms of Limited Warranty described above. Some states do not allow limitations of how long an implied warranty lasts and /or do not allow the exclusion or limitation of incidental or consequential damages, so the limitations and exclusions herein may not apply to you.

Manual Locking Hubs

Knee deep in mud with a failed automatic hub and a disabled vehicle? The only way to repair it is to replace it. The question is, with what? Factory automatic hubs have a history of failing when you need them most. A damaged hub will render your 4x4 useless and leave you stranded. Wish you could swap your venerable automatic hubs to a set of manual locking hubs? Rugged Ridge has heard your plea. Rugged Ridge Manual Locking Hubs are unanimously recognized as the world's toughest hubs by our thousands of satisfied customers worldwide. Brute strength matters, that is why the bodies of our hubs are crafted from impact resistant nodular iron, and feature a corrosion resistant die cast aluminum cap. Our hubs deliver better 4WD performance when locked and improved fuel economy in 2WD when unlocked, than automatic hubs. Purchasing a set of premium manual hubs is more cost effective than servicing your worn factory hubs. With the money you save you'll be able to carry a spare set, not that you'll need them. Sure you have to get out of the cab to lock the hubs, but unlike automatic hubs you won't have to wait until you lose traction for your four-wheel drive to engage.

Rugged Ridge Premium Hubs Feature:

- A full metal cap and body crafted from impact resistant nodular iron.
- Corrosion resistant die cast aluminum caps coated with high luster epoxy enamel for along lasting finish.
- Better 4WD performance when the manual hubs are locked. Works in reverse and compression braking.
- No slippage or partial engagement / disengagement issues that plague automatic hubs.
- Better fuel economy by freewheeling in 2WD mode. Great for any "tow vehicle".
- Decreases wear on internal components by engaging 4WD only when needed.
- More durable and cost effective than replacing or servicing automatic hubs.
- Ridiculously simple installation. Your average installation is completed in less than 20 minutes.
- Manual hubs offer extra gear ranges. By unlocking your hubs and driving in 4WD mode, you gain use of 2WD Low and 2WD High ranges.

Alloy USA® Dana 30 Manual Locking Hub Conversion Kits

The Alloy USA® Hub Conversion Kit is designed to upgrade and replace the non-serviceable wheel hubs found on 1984-06 Wrangler and Cherokees. Now you can lock and unlock your front hubs to reduce driveline strain and improve fuel economy! The Deluxe Hub Conversion kit includes a set of Rugged Ridge® Manual Locking Hubs, high tensile strength 27 spline inner and outer Alloy USA® 4340 Chromoly Axle Shafts, 1/2 ton capacity aluminum internal mounting hubs, Alloy USA® X-Joints, machined front brake rotors, bearings, seals and hardware.... everything you need to upgrade your rig and prepare it for the trail. Maximum recommended tire size is 33".

Alloy USA Grande Hub Conversion Kits Feature:

- Better fuel economy by freewheeling in 2WD mode. Decreases tire wear since unlocked manual hubs rotate more freely.
- USA® 4340 Chromoly Axle shafts that are 40% stronger than stock axle shafts.
- Includes beefy Corrosion resistant die cast aluminum Rugged Ridge® Manual Locking Hubs.
- Replaces stock U-joints with premium Alloy USA® X-Joints.
- Includes 1/2 ton capacity aluminum mounting hubs and hardware.
- Decreases wear on internal components by engaging front axles only when needed.
- Unlike other kits, we include pre-machined brake rotors to eliminate guess work and hassles.
- More durable and cost effective than replacing or servicing factory hubs and axles.
- Great for any "tow vehicle".

Differential Cable Lock Kits

- A permanent replacement for the failure prone OE vacuum and electric front axle engagement systems.
- Allows you to engage the front axle from inside the cab.
- Engagement every time because you are in direct control.
- A 1" pull of the cable ensures you will have 4-wheel drive when you need it, as long as the transfer case is engaged.
- It is not a posi-trac or locker.
- Simple and easy to install.
- A patented front axle engagement system.

Lock Right® Lockers

The Powertrax Lock-Right Lockers performance is equal to a solid spool axle, yet automatically unlocks to allow full differentiation in turns. The locker also reduces the excessive noise, tire wear, and drivetrain damage associated with other lockers. Powertrax lockers replace the spider gears in your differential carrier without affecting your ring and pinion settings. The whole job can be done in your driveway with common hand tools in a couple of hours. A carrier is not included. Whether it be snow, sand, mud, ice, etc... the LOCK-RIGHT will give you the traction you need.

Performance Rear Axle Shafts

15104

Don't just replace your axle shafts, upgrade them. For less than the cost of an original replacement axle shaft you can upgrade to an Alloy USA™ performance shaft. Made from 4140 Chromoly, each axle is heat-treated, tempered and induction hardened to have twice the tensile strength than stock and is up to 35% stronger. We use the latest splining technology, to produce splines that are stronger than traditional cut splines.

Jeep® Ring & Pinions

These affordable high strength gear sets come in all the popular ratios to satisfy everyone's gearing needs. Oversized tires require higher ring & pinion ratios to restore performance. Made from high quality 8620 forgings and Gleason gear cutting technology, these gears are made to last. Complete installation kits are available separately to complete the job. Exclusive 5-year warranty. Available in 3.73, 4.10, 4.56, 4.88 and 5.13 ratios.

Wheel Spacers

NEW!

- Moves your wheels out to help fit wider tires-creates extra stability.
- Hub centric design to assure wheel balance.
- Constructed of durable 6061T6 aluminum for long life, extra strength and corrosion resistance.
- Available in 1.25" to 1.5" widths for today's most popular wheel sizes.
- Each pair includes pre-installed grade 8 wheel studs, 10 lug nuts and thread locker.
- Wheel adaptors convert current bolt patterns to alternate bolt patterns for use with different wheels.
- Wheel Spacers and Wheel adaptors are sold in pairs.

Wheel Spacers

Vehicle Application	Width	Bolt Pattern	Part #

Alloy HD Differential Covers

Indestructible! You won't break these cast covers, we guarantee it. Made from either 3/8" cast steel or 5/16" stamped steel, painted black inside and out, these heavy-duty covers are designed to protect your differential and all its working parts for as long as you own your vehicle. These indestructible covers have been ".44 caliber tested" - if they can take a bullet at point blank range (don't try this at home!), they can take all that the trail has to offer. Available for most popular Dana differential types and include extra reinforcement protection for the fill plug area. All mounting hardware and instructions are included for ease of installation.
